

- Important Safety Information**
- Warnings:** When using this product, basic precautions should always be followed, including the following:
- Do not carefully read the User Manual before using the power bank.
 - Close supervision is needed when power bank is used near children.
 - Do not strike, hit or insert any foreign objects into the power bank or any of its ports.
 - Do not expose the power bank to heavy rain/snow to avoid malfunction.
 - Do not immerse the power bank into water to avoid malfunctions.
 - Do not disassemble or attempt to the power bank without authorization from manufacturer.
 - Do not use the power bank if it has been damaged or modified; if you see bulging, swelling, leakage or other abnormality from the power bank, stop using it immediately.

- 1. The suggested working/storage temperature is between -4°F and $+140^{\circ}\text{F}$ (-20°C $+60^{\circ}\text{C}$).
- 2. Do not expose to power tools to fire or extreme high temperatures. Exposure to fire or temperature above 176°F (80°C) will cause battery venting and explosion.
- 3. Do not expose the power bank to the car dashboard without supervision. Under wet weather, the temperature inside a parked car can reach above 176°F (80°C) which could cause battery swell up or explode.
- 4. Do not leave the power bank on the surface of concrete wall and wooden floor to have the battery being soiled. When charging at night, the surface temperature of concrete wall and wooden floor may reach above 176°F (80°C), where the battery may swell up or explode.
- 5. For solar panel charging, use environment that you think the solar bank is in a well-ventilated environment for solar charging to avoid the battery due to extremely high temperature.

- Legal and the Regulatory Compliance**
- All SUPON power bank have undergone extensive tests and the strict quality control procedures. Both our factory and products are tested and certified.
- 1. ISO 9001: Quality management system that demonstrates our ability to consistently provide products and services that meet customer and applicable statutory and regulatory requirements.
 - 2. UN38.3 Test Certificate: This ensures that the battery cell used in the power bank adheres to safety standards for things like maximum continuous charge voltage, cut off voltage, short circuit, number of cycles, discharge etc.
 - 3. MSDS Certificate: This is the Material Safety Data Sheet, all of our power banks come with MSDS sheets, these sheets outline all hazardous materials with batteries, handling, procedures, precaution etc.
 - 4. UL 2056 Test Certificate: A safety standards provided by UL, experts have been gone through a series of in depth tests and have certified that all our products are safe.
 - 5. CE Certificate: All our power banks are certified with CE certificates to ensure they comply with regulations for sale in Europe Market.

Product Parameters	
USB Output Port	DC 5V/3A (MAX)
USB Charge Port	DC 5V/3A
USB C Input Port	DC 5V/2.4A
Lighting Input Port	DC 5V/2A
Lighting Output Cable	DC 5V/2A
USB C Output Cable	DC 5V/2A
Micro USB Output Cable	DC 5V/2A
USB-A Input Cable	DC 5V/2.1A
Solar Charging Input	DC 19V/2.5A (SMP Power: >5000μp)
Battery Capacity	30,000mAh/25.2V x 6Ah
Power of LED Light	1W

Accessories Include	
Solar Power Bank x1	
USB C to USB C Charging Cable x1	
Cable x1	
User Manual x1	

- ### Product Features

- Use built-in output cables
Gently press the power switch.
LED power indicators light up
into the corresponding device.

- **Use built-in output ports**
Gently press the power switch to turn on the power bank, the LED power indicators light up, plug the charging cable in the charging ports and your devices. This power bank supports charging multiple devices simultaneously.

- (G) Recharge the power bank.

3. Use the built-in input cable
Gently press the power switch to turn on the power bank, the LED power indicators light up, take the cable out, plug into a USB adapter to recharge the product. The blue LED power indicators flash when charging, and four power indicators all light up when fully charged.

- **Self-censoring**

- 11

- To ensure the maximum efficiency of this product, please pay attention to the following matters:
- (1) Keep away from moisture and corrosive substances.
 - (2) Do not use chemicals to clean the product.
 - (3) When the product is not used for a long time, please charge it once every six months.

- Other Important Notes**
- (3) This product is suitable for charging equipment within the specifications of DCSV/3A, if use the charging equipment beyond this specification may cause damage to the product.
 - (2) Please do not disassemble or modify this product.
 - (3) Please pay attention to fire and moisture, to prevent malfunction.
 - (4) Do not use this product in the high-temperature environment (+45°C).
 - (5) Please connect the equipment that meets the output

- (f) The built-in laser light of this product cannot directly shine on the eyes of people or animals, otherwise it may cause damage to the eyes.

- ### Common Problems and Solutions

- charge this cable and try to

- Check if the USB output cable is good and if there is any abnormality when connecting to the device that needs to be charged
- Check if there is any abnormal noise or odor in the product
- Please do not disassemble the power bank, for safety

- (2) If the problem cannot be solved after the above methods, please feel free to drop us a message via Amazon or contact our after-sales service for help.

- Thrombotic and other complications**

- Every Suiron® product is provided with at least 12 months of warranty and lifelong technical support.
- Within 30 days from the date of purchase, products in good packaging and without damage can be returned and fully refunded.
- A free exchange for products having quality problems within 12 months.
- If you are not 100% satisfied with our products, please feel free to drop us a message via Amazon or contact our customer service at info@suiron.com. We attach great importance to customer feedback and will get back to you within 24 hours (including weekends).

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. The device has been evaluated to meet general RF exposure requirement.

The device can be used in portable exposure condition without restriction.
