# General description

HHR5000 is a dual RFID reader.

## Introduction

The HHR 5000 is an easy to operate Handheld Reader for ISO 11784/11785 transponders. It is designed to be used under 'real life' conditions and combines great reading performance, enhanced computer features with ease of operation.

The HHR5000 is a modular unit which consists of:

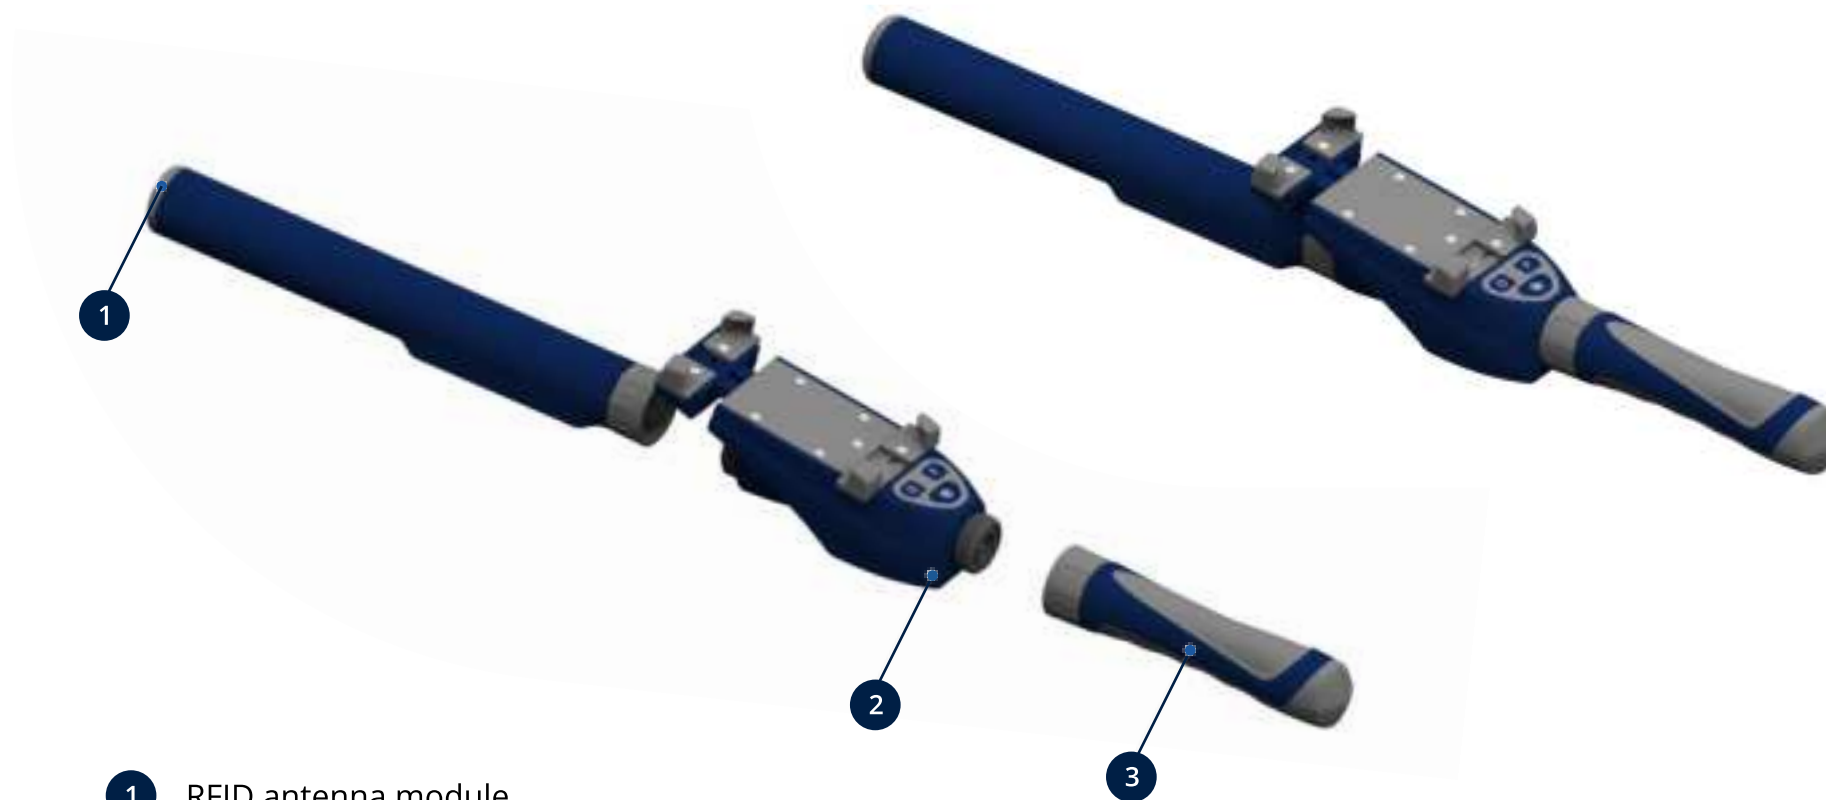

1. Handgrip with Lilon battery
2. Main unit with keyboard, touch LCD screen, or grips for smartphone attachment

Both versions communicate with smartphones, tablets or PC over BLE interface

3. Antenna with ISO Module that reads HDX, FDX and B-delaval transponder and NFC reader (optional)
