Gentlemen:

On behalf of TDK Systems Europe, Ltd., herewith is an application for multiple list of an identical equipment. This equipment is identical to the equipment currently applied for, Tactel AB FCCID: PRK531102. As such, their unit is both a transmitter subject to certification and a Class B peripheral subject to DOC. The DOC has been obtained. The Tactel unit uses the Ericsson Microelectronics AB radio transceiver which has been approved under FCC ID: PNI8001001. Hopping system parameters and timing characteristics are identical to the previously approved Ericsson unit. A copy of the emissions measurement report for the Tactel unit is being submitted that shows the Tactel AB implementation complies with the FCC Rules. The antenna can be seen on the pcb photograph just below the Ericsson Radio chip. It is a pcb board strip line type. The modifications shown in the photograph will be implemented in all units that are manufactured. A cover letter from Tactel AB stating they are supplying the unit and that TDK can use the filing material has been submitted.

Regards,

Phillip Inglis
