DONE and success.	• Quick Guide of Using Amazon Echo to Control Smart Devices 1.What you need to get started • Stable Wi-Fi network which could access to Amazon server. • An Echo device, including Echo, Echo Tap, or Echo Dot. • An Amazon account. • Smart Life: app and a related account. (Please refer to the user manual) • Smart devices. 2.Link Smart Life: account to Alexa	2.1 Tap "Skills" in the hamburger menu, then search "Smart Life". Select "Smart Life" and tap "ENABLE" to enable the Skill. 
2.2 You will be redirected to the account link page. Type in your Smart Life: account and password, don't forget to select the country/region where your account belongs to. Then tap "Link Now" to link your Smart Life: account. The country/region, account, and password must be the same with your registry.	3. Control your smart devices through Echo 3.1 Discover devices Echo needs to discover your smart devices before it controls them. You can say "Alexa, discover devices" to Echo. Echo will discover device which have already been added in the Smart Life: app.You can also tap "DISCOVER" to discover the smart devices. Discovered devices will be shown in the list. 	3.2 Control devices by voice commands Now you can control your smart devices through Echo. You can use the following commands to control your devices(e.g., bedroom light): Support Skill List You can control devices by instructions like below: • Alexa, turn on/off bedroom light. • Alexa, set bedroom light to 50 percent. • Alexa, brighten/dim bedroom light. Note: every time you change the device's name on Smart Life: app, Echo must re-discover before you control them. Note: The name of device must be consistent with the addition of Smart Life: app
• Quick Guide of Using Google Home to Control Smart Devices 1. What you need to get started • A Google Home device, or Android phone with Google Assistant. • Latest Google Home app. • Latest Google app (Android only) • A Google account. • be device display language must be set to English US. • Smart Life: app and a related account. • Smart devices. 2. Link Smart Life: account in Home Control	2.1 Tap "Home Control" in the hamburger menu on the Google Home app's home page, then tap "+". 	2.2 Find "Smart Life" in the list. In the new window, select your Smart Life: account's region, type your Smart Life: account and password, then tap "Link Now". After you assign rooms for devices, your devices will be listed in the Home Control page. 

3. Control your smart devices through Google Home Now you can control your smart devices through Google Home. Take bedroom light as the example, the supported voice commands are below: - OK Google, turn on/off bedroom light. - OK Google, set bedroom light to 50 percent. - OK Google, brighten bedroom light. - OK Google, dim bedroom light.	• Quick Guide of Using IFTTT to Control Smart Devices 1. What you need to get started - Stable Wi-Fi network which could access to IFTTT server. - A device, which could use IFTTT service, including computer or mobile device. - An IFTTT account, could be replaced by Facebook account or Google account. - Smart Life app and a related account. - Smart devices, could be control by IFTTT service. 2. Set up IFTTT and enable Smart Life Skill User can configure IFTTT through web or app. We take app configuration as an example in this guide. Web: https://ifttt.com/discover/Configurationthroughweb is basically the same as app App: Search "IFTTT" in App Store or Google Play to install the app.	2.1 Sign in IFTTT app - Open the IFTTT app by tapping the app icon on your mobile device. - Type in your IFTTT account and password, then tap "Sign in". IFTTT account could be replaced by Facebook's account or Google's account. - When you sign in IFTTT app successfully, the display in the app is shown as below. 
2.2 Link Smart Life account to IFTTT 1. Tap "Search" below the screen, then enter "Smart Life" in the search box, select the "Smart Life" option, and tap "Connect" to enable Smart Life. 	2. You will be redirected to the account link page. Type in your Smart Life account and password, don't forget to select the country/region where you check in on. Then tap "Link Now" to link your Smart Life account. After you account is linked in the "Services" of "My Applet". 	3. Create Applet to control your smart devices (Example 2) IFTTT is the abbreviation of "If this then that". "Applet" represents a complete task composed of conditions & tasks. "this" represents the condition, while "that" represents the task. Example 2: create an Applet (If I come to the room, my bedroom light will be turned automatically). 3.1 Create "this" to configure the trigger Step 1, tap "My Applets" tab in IFTTT app, and then tap the "+" symbol on the top right of screen to establish a new Applet. Step 2, tap "this" to add a condition for Applet, and then tap "Location" on the service search page. Step 3, select detail trigger in "Location", such as "I'm out enter an area". Step 4, select a specific area by dragging the map or directly entering the location name. Step 5, tap the "+" on the top right of screen to save this condition.
		3.2 Create "that" to configure the task - Tap "that" to add a task, and then enter "Smart Life" in the search box, select the "Smart Life" option. - Select detail action in Smart Life, such as "Turn on". 
- Choose the corresponding equipment, and then tap the "+" on the top right of screen to save this task. - Tap "Finish" to complete the creation of this Applet, and it will be saved automatically. You can check it in the "All" of "My Applets". When we turn on the bedroom light (trigger condition), the color of the light will be set to green automatically (to perform the task). 	Federal Communication Commission Interference Statement This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: - Reorient or relocate the receiving antenna. - Increase the separation between the equipment and receiver. - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. - Consult the dealer or an experienced radio/TV technician for help. Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.	FCC Caution: This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. FCC Radiation Exposure Statement: This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body. RF Exposure: A distance of 20 cm shall be maintained between the antenna and users, and the transmitter module may not be co-located with any other transmitter or antenna.
