The image shows a circular PCB, likely a custom board for a Raspberry Pi 4 Model B. The board is black and populated with various electronic components. Key components visible include:

- SoC (System on Chip):** A large, square, silver-colored chip in the center, labeled "7".
- RAM:** Two rectangular, silver-colored chips on the left side, labeled "1" and "2".
- Storage:** A rectangular, silver-colored chip on the right side, labeled "3".
- Connectors:** A USB-C port at the bottom center, a micro-USB port at the bottom right, and a 4-pin header at the bottom left.
- Other components:** Various capacitors, resistors, and smaller integrated circuits are scattered across the board.

The board is placed on a blue surface next to a ruler for scale. The ruler shows measurements in centimeters (0 to 100) and millimeters (0 to 10). The board's diameter is approximately 100 mm.
