<Conducted Emission>

Remote View

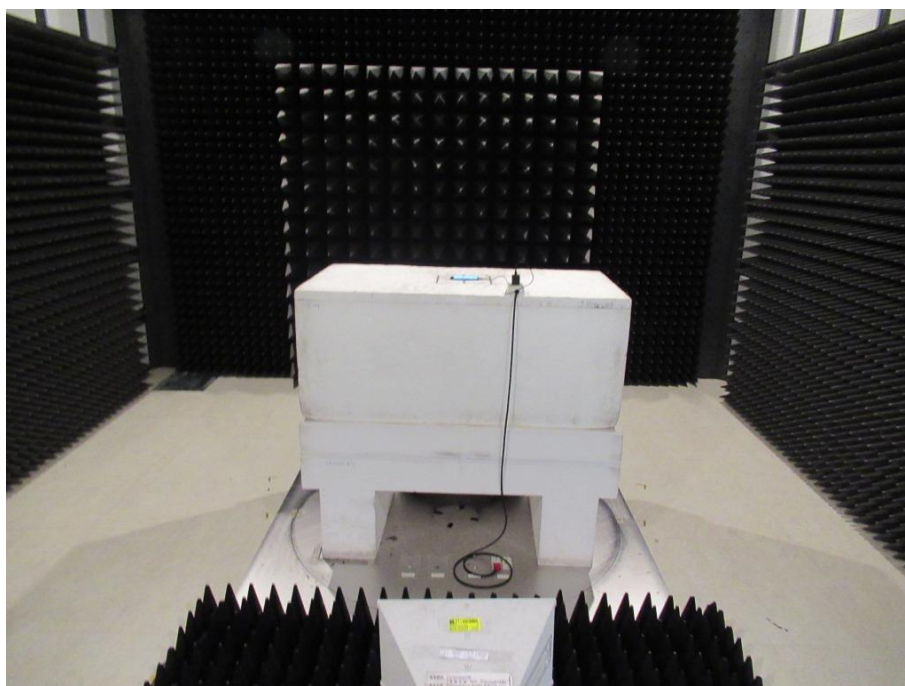

A photograph showing the interior of a laboratory chamber. The chamber has a thick, translucent, slightly textured front panel. Inside, on a metallic floor, there are several electronic components: a large silver rectangular power supply or amplifier with blue and yellow connectors, a smaller black power supply, and some white electronic modules. A black cable runs across the floor. The chamber is supported by a dark metal frame, and the ceiling is a light-colored wooden panel. In the background, through the chamber's opening, other laboratory equipment is visible.
