1. General Description

SOLUM SmartTag is a slim device that can easily put inside your Bag, combine with key or attach to any of your valuable item. Use the Samsung Smart Things APP to locate your belongings by finding them with the Crowd Locate.

- **Phone Finder**

2-way finding capabilities on Smart Tag help you find your phone – press Smart Tag button to cause your phone to ring.

- **Item Finder**

You can hear sound from Smart Tag when you want to find Smart Tag by APP function.

- **Crowd GPS**

Smart Things network will help you find it. Get a location update when another Smart Tag user is in range of your item.

- **Multiple Device**

Smart Things app allows you to track multiple devices. The number of devices varies based on Smartphone.

- **Various Alert Sound**

Designate any of your favorite tunes as your alert sound. Change the sound the Smart Things app makes when you leave belongings behind.

4. FCC

WARNING: This equipment may generate or use radio frequency energy. Changes or modifications to this equipment may cause harmful interference unless the modifications are expressly approved in the instruction manual. The user could lose the authority to operate this equipment if an unauthorized change or modification is made.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
