**Overall Letter in support of Class 2 Permissive Change to Symbol Product M9060B**  
**FCC id: H9PMC9060B**

This product consists of 2 DSS Radio transmitters : An 802.11 WLAN and a Bluetooth Transmitter

This was approved by BABT as TCB in a configuration which did not support simultaneous transmission .

This Permissive Change covers the minor software modification to lift that inhibition.

The Enclosed test reports demonstrate that neither the overall SAR nor spurious transmissions have been significantly changed by this modification.

Please note that since the SAR report is a "Supplementary report" it should be reviewed in conjunction with the original SAR report, and not on its own.

Both reports demonstrate continued compliance.

Yours sincerely

Hilton Carr
