

This image shows the internal components of a mobile phone. The main circuit board is green and populated with various electronic components, including a large black integrated circuit (IC) labeled 'PNL82574ZA-WK 2016.04.13 KX-TGM4xx', several capacitors (e.g., 470 10V DYC), and a small black component labeled 'IC501'. A silver-colored circular component, likely a speaker or microphone, is visible on the right side. The battery is a large, black, rectangular unit at the bottom. The phone's casing is black, and the internal components are secured with screws. A white label with the number '15' is visible on the left side of the circuit board.
