# Safety and Warranty Precautions for This Product

- Before using and operating the device, please read and abide by the following precautions to ensure the best performance of the device and avoid dangerous or illegal situations.
- The radio waves generated by the device may affect the normal operation of implanted medical devices or personal medical devices, such as pacemakers, cochlear implants, hearing aids, etc. If you are using these medical devices, please consult the manufacturers about the restrictions on using this device.
- When using this device, please keep a distance of at least 15 centimeters from the implanted medical devices (such as pacemakers, cochlear implants, etc.).
- Please use this device within the temperature range of  $-20^{\circ}\text{C}$  to  $+60^{\circ}\text{C}$ . When the environmental temperature is too high or too low, it may cause the device to malfunction.
- This device contains batteries and some small parts. Please keep the device and its batteries out of the reach of children. Children may accidentally damage the device or swallow small parts or batteries, resulting in choking or other dangers.
- Do not place the device in areas with excessively high (such as heat sources, open flames) or low temperatures, otherwise it may lead to device malfunction, fire or explosion.
- Do not disassemble or modify the device without authorization. Otherwise, the device will not be covered by our company's warranty. If the device malfunctions, please contact the manufacturer.

- Please make sure that children do not swallow this product. If you think the product may have been swallowed or accidentally placed inside any part of the body, please seek medical attention immediately.
- Keep the interface clean and dry when charging.
- It is prohibited to change the usage scenarios or conditions without authorization, expand the transmission frequency range, increase the transmission power (including adding radio frequency power amplifiers additionally), or change the transmitting antenna without permission.
- It is not allowed to cause harmful interference to other legal radio stations, nor is it allowed to claim protection from harmful interference.
- It should withstand the interference from industrial, scientific and medical (ISM) application equipment that emits radio frequency energy or from other legal radio stations.
- If harmful interference is caused to other legal radio stations, the use should be stopped immediately, and measures should be taken to eliminate the interference before the device can continue to be used.
- When using low-power devices within aircraft, or within the electromagnetic environment protection areas of military and civilian radio stations such as radio astronomy observatories, meteorological radar stations, satellite earth stations (including tracking, ranging, receiving and navigation stations) which are demarcated according to laws, regulations and relevant national provisions and standards, as well as in airports, the regulations on electromagnetic environment protection and those of relevant industry regulatory authorities should be complied with.
- It is prohibited to use all kinds of model remote controllers within the area with a radius of 5,000 meters centered on the center point of the airport runway.

- FCC Warning
- This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
- Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
- This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
  - - Reorient or relocate the receiving antenna.
  - - Increase the separation between the equipment and receiver.
  - - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
  - - Consult the dealer or an experienced radio/TV technician for help.
- The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
