To whom it may concern.

The Wireless Microphone exists in four product variants, RM-WOM, RM-WDR, RM-WGS and RM-WGL, which all use the same PCB, but with minor population differences. The reduced user interface on the RM-WDR, RM-WGS and RM-WGL variants means that some parts are 'not mounted', e.g. colour LED's and capacitive touch points.

The gooseneck variants are identical except for the difference in gooseneck length.
