

EXHIBIT 1 CFS8DL5869

Functional Description.

The 5869 is a battery powered panic alarm transmitter and is part of a wireless alarm system. It is used in conjunction with a receiver (5881) to indicate an holdup to the alarm system.

These messages are transmitted at 345Mhz +/-82Khz using on-off keyed AM modulation.

The 5869 sends a regular supervision or check-in message, no more often than once per hour. It also sends messages initiated by the condition of the built in panic switch.
