

needs a Google account to operate. If you don't have a Google account or you haven't registered your account in the device, you will be guided to create or register one before you proceed.

2. You can choose an application by browsing among the availa-

ble application categories or you can tap  to search for it by its name or description.

3. When you choose the application that you want to download, tap **INSTALL** > **ACCEPT**.

►► Removing an application

1. Press **Home key** > tap  >  **Settings** > **Apps**.
2. Select the application you want to delete.
3. Tap **Uninstall** and **OK** to confirm.

Doing a factory reset

If you want to restore your device software to the state it was when you first got it out of the box, please follow this procedure:

1. Press **Home key** > tap  >  **Settings** > **Backup & reset**.
2. Click **Factory data reset**.
3. Touch **Reset tablet**.

Technical specifications

CPU	Mediatek MT8163
Connectivity	WIFI 802.11 a/b/g/n, Bluetooth 4.0, GPS
Operating System	Android 6.0
Screen	8.0 inch WXGA IPS Screen
Memory	RAM 1GB ROM 16 GB
Camera	Front camera 0.3 MP, Back camera 2 MP
Input / Output	3.5mm minijack stereo headset Internal speaker Micro-USB data & charging HDMI
Battery	Embedded battery Li-Ion 3500mAh
Interface	Volume buttons On/Off button
Size	208.5 x 120.5 x 8.6 millimeters

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Specific Absorption Rate (SAR) information:

This device meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.

FCC RF Exposure Information and Statement The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. This device was tested for typical body operations with the back of the handset kept 0mm for body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 0mm for body. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

Body-worn Operation

This device was tested for typical body operations. To comply with RF exposure requirements, a minimum separation distance of 10mm for body must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
