

Features and Benefits

- Creates a Point-to-Point connection linking two LANs, using 2 Indoor Units or Indoor and Outdoor total solutions.
- Integrated 90 degree sector antenna provides the easy installation and cost effective hotspot and PTMP under 5 KM solution.
- The ODU act as bridge and access point at the same time with the WDS function.
- With a data rate up to 54Mbps, the system is faster than an E1/T1 data link.
- Features 54Mbps data rate by incorporating Direct Sequence Spread Spectrum technology.
- Fully IEEE 802.11b/g compatible. Allow inter-operation among multiple vendors.
- Technique operating in the unlicensed 2.4GHz ISM band.
- Seamless roaming within the 802.11 & 802.11b/g wireless LAN infrastructure.
- Provides the highest available level of WEP /WAP-PSK as well as MAC Address Control to increase security.
- MAC address Access Control.
- Provides Window-based configuration utility.
- IP67 rated weatherproof housing
