Indicator light guide

The indicator light of the charging case consists of 12 white lights and 1 red light.

1. When you open the charging compartment button, the white light is always on, and when you click it again, the white light will turn off after about 10S, and the subsequent clicks are all in this state cycle.

2. When you press and hold the charging case button, the light will turn off 1 second from two seconds.

3. **When the charging case is charging,** the six blue light flashes singerly, and when fully charged, the six blue light is always on.

4. **When the earbuds are placed in the charging case,** the base light is always on when charging, and when fully charged, only the six blue light of the earbuds flashes 5 times, and then turns off.

5. **When the charging case is low on power,** the white light flashes 5 times every 5 seconds, and then turns off after 3 cycles of low battery discharge. double-click the button to detect the power level, the white light flashes for 1 second and then turns off when it is lower than 20%, and the white light flashes for more than 3.5V, the white light flashes for 5 seconds and then turns off.

How to disconnect from Bluetooth

Disconnect the phone manually or put the dual earbuds into the charging case to disconnect the Bluetooth connection from the device.

How to save your headphones

The earbuds should be stored in the charging dock, and avoid storing the Bluetooth headphones in extreme temperatures (above 60°C or below -10°C), otherwise the battery life will be shortened.

FCC warning FCC ID:2AA666-HHLMB3SBKQ

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

—Reorient or relocate the receiving antenna.

—Increase the separation between the equipment and receiver.

—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

—Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This transmitter must not be colocated or operating in conjunction with any other antenna or transmitter.
