Re: Information to Address 15.407(c) requirement of the Rules

Applicant: Alvarion Ltd.

FCC ID: LKT-VL-53C

CCS Assessment No.: AN06T5745

Dear Chris,

The referenced product employs Ethernet communications protocol. Signals are transmitted when (1) a device is attempting to join a network, and (2) when a transmit request for the device has been received from the network. Otherwise the device does not transmit, as there is no information required to be transmitted.

In the event of equipment failure, the design is such that the product will neither receive nor transmit, or else will remain in an undetermined idle state where there will be no transmissions from the device.

If you have questions or need further information, please contact the undersigned.

Sincerely,

T.N. Cokenias

Agent for Alvarion Ltd.
