

To Whom It May Concern:

FBO-2003 is designed to work using a SDR test mode for ease of device configuration and test and validation cycles. SDR information was provided to test lab to perform all the lab tests with our user guided manual and selection tool. All the software related information and data packages are proprietary and highly confidential.

Please contact me if there is any information you may need.

Sincerely,

A handwritten signature in black ink, appearing to read "Saurabh Sanghai".
