Figure 1 displays four screenshots of the 'Smart Home' app interface, showing different settings screens:

- Network Settings:** The first screenshot shows the 'Network Settings' screen. It includes a status bar at the top with the time 10:00 and battery level 100%. Below the status bar is a blue header with the text 'Network Settings'. The main content area has a blue background and contains a large blue button labeled 'Network Settings'.
- Device Settings:** The second screenshot shows the 'Device Settings' screen. It features a blue header with the text 'Device Settings'. Below the header is a white card with a blue border containing a list of devices: 'Smart Home', 'Smart Home', 'Smart Home', and 'Smart Home'. Each device entry has a blue checkmark icon to its left. Below the card is a blue button labeled 'Device Settings'.
- Device List:** The third screenshot shows the 'Device List' screen. It has a blue header with the text 'Device List'. Below the header is a white card with a blue border containing a list of devices: 'Smart Home', 'Smart Home', 'Smart Home', and 'Smart Home'. Each device entry has a blue checkmark icon to its left. Below the card is a blue button labeled 'Device List'.
- Device Details:** The fourth screenshot shows the 'Device Details' screen. It features a blue header with the text 'Device Details'. Below the header is a white card with a blue border containing a list of devices: 'Smart Home', 'Smart Home', 'Smart Home', and 'Smart Home'. Each device entry has a blue checkmark icon to its left. Below the card is a blue button labeled 'Device Details'.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
- This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
