

MONSTER
SMART LIGHTING

GETTING STARTED

Thank you for choosing this Smart RGB+IC Flow Light Strip. This Quick Start Guide will help you with setup and installation of your device.

WHAT'S IN THE BOX

- 49.2ft/15m Smart RGB+IC Flow Light Strip with attached controller and pre-installed mounting adhesive
- Light Strip Mounting Clips + Screws
- 12V 2A Power Adapter
- Quick Start Guide

WHAT DO YOU NEED?

- Wi-Fi router with 2.4GHz 802.11 network
- Mobile device running Android 9.0 Pie or higher / iOS 12 or higher, with Bluetooth and location enabled
- Monster Smart Lighting app on your mobile device

TIP: Do you know your Wi-Fi network name and password? Write it down now if it's hard to remember.

ANYTHING ELSE?

Your LED Light Strip comes with preinstalled mounting adhesive; but you should use the included mounting clips and screws if you would like a more secure installation; you will need a philips head screwdriver to install with the clips.

TIP: Save these instructions for future reference.

SETUP COMPLETE SETUP BEFORE INSTALLATION

STEP 3

Remove all components from the box. It is recommended to first pair your device in a location close to your router BEFORE installation.

Connect the 12V 2A power adapter (included) and the light strip to your device. Turn on your device.

NOTE: If desired, you can operate the device with the controller and without pairing to Wi-Fi and without the app. Advanced features like color customization, scheduling, and voice control will not be available. (See "How To Use" on page 6)

To enter pairing mode or reset the device at any time, press and hold the button for 8 seconds.

STEP 1

Download the free Monster Smart Lighting app from the App Store (for iPhone) or Google Play Store (for Android phones). In the Monster Smart Lighting app, select the "+" and then "device" to add a new device.

STEP 4

In the Monster Smart Lighting app, select the "+" and then "device" to add a new device.

STEP 5

Once the pairing process is complete, your device will receive any available updates from the network.

TIP: Please Note: Installing the newest and best features may take up to 5 minutes.

CONGRATULATIONS!

Before you start, we need to set up a few things for a smooth pairing process:

- Make sure your phone or tablet is successfully connected to the 2.4GHz Wi-Fi network that your device will be placed on.
- Enable Bluetooth and location - To find payable devices and successfully connect them with your home network, you must allow access to location services when prompted.

Note: Now that setup is complete, your mobile device no longer needs Bluetooth enabled or to stay on your 2.4GHz network to operate your lighting device. Using the Monster Smart Lighting app, you can control your device from anywhere!

TIP: For best mounting results, place adhesive onto the desired surface with ONE attempt. Reapplying multiple times will not guarantee secure mounting onto the surface.

NOTE: Most Smart devices only set up on a 2.4GHz Wi-Fi network for better range and transmission through walls. Many home Wi-Fi networks are mixed networks that are set to 5GHz or 2.4GHz (or both). AT&T, Verizon) and you may need to access your router settings and/or call your internet Service Provider to create a separate 2.4GHz network.

INSTALLATION

STEP 1

Determine where you will install the LED Strip. Decide on a mounting surface that is close to a power source.

NOTE: If desired, you can operate the device with the controller and without pairing to Wi-Fi and without the app. Advanced features like color customization, scheduling, and voice control will not be available. (See "How To Use" on page 6)

Mounting surface is smooth and clean.

Clean the mounting surface with a clean cloth and rubbing alcohol to remove any dust or oils that will weaken the adhesive. Be sure to let it dry before installation.

OPTIONAL (Recommended for unsound surfaces)

Press and hold 2 sec - cycle between White, Color, Static, Dynamic, City & Music Modes.

COLOR/SCENES: single press - change between Color/Scene presets. (Or access the custom edits of scenes, requires Wi-Fi pairing and edit)

RESET/PAIR: long press and hold 8 sec - reset device and to pair to your Wi-Fi network.

A2: Both platforms can be controlled through the use of third party integrations like Hey Google, Amazon Alexa, Siri Shortcuts, and Razer Chroma RGB.

STEP 2

Peel off the beginning of the adhesive backing and firmly stick the LED Strip onto the surface. Peel off more of the adhesive backing as you mount the LED Strip, pressing on each section of the strip for 10 seconds as you place it.

A3: For best mounting results, place adhesive onto the desired surface with ONE attempt. Reapplying multiple times will not guarantee secure mounting onto the surface.

STEP 3

Use the included cable clip to help support the weight of the controller and hold it in the desired installation position. Insert the cable into the clip either before or after the controller whenever it will.

STEP 4

Connect the 12V 2A power adapter (included) and the light strip to your device. Turn on your device.

STEP 5

Once the pairing process is complete, your device will receive any available updates from the network.

TIP: Please Note: Installing the newest and best features may take up to 5 minutes.

HOW TO USE

PC DESKTOP CONTROL

This device complies with Part 15 of the FCC. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

STEP 3

Use the included cable clip to help support the weight of the controller and hold it in the desired installation position. Insert the cable into the clip either before or after the controller whenever it will.

STEP 4

Connect the 12V 2A power adapter (included) and the light strip to your device. Turn on your device.

STEP 5

Once the pairing process is complete, your device will receive any available updates from the network.

STEP 6

In the Monster Smart Lighting app you can customize your experience by exploring color, modes, scenes & music syncing.

STEP 1

For additional information, FAQ, and helpful instructions, please access the Support option in the app or SCAN HERE.

STEP 2

Connect the adapter cord to the light strip, then plug the adapter into a powered outlet. The LED Strip will automatically reconnect to the paired Wi-Fi network and will now be ready to use!

STEP 3

The light source contained in this luminaire cannot be replaced; if the cord is damaged, the luminaire shall be destroyed.

STEP 4

Connect the adapter cord to the light strip, then plug the adapter into a powered outlet. The LED Strip will automatically reconnect to the paired Wi-Fi network and will now be ready to use!

STEP 5

By the manufacturer or its service agent or a similar qualified person.

A1: Make sure your phone or tablet is successfully connected to the 2.4GHz Wi-Fi network that your device will be placed on.

A2: Make sure you enable Bluetooth and location on your phone or tablet to find nearby devices.

A3: Make sure your phone, your Wi-Fi router, and your device are all in close proximity to each other during the pairing process (within 10ft is ideal).

A4: If your Wi-Fi network is a mixed 2.4GHz/5GHz network, you may need to access your router settings and/or call your internet Service Provider to create a separate 2.4GHz network.

STEP 6

Smart RGB+IC LED Flex Light Strip Model: MLW7-1003 Input: 12V 2A

NOTE: For best mounting results, place adhesive onto the desired surface with ONE attempt. Reapplying multiple times will not guarantee secure mounting onto the surface.

STEP 7

Smart RGB+IC LED Flex Light Strip Model: MLW7-1003 Input: 12V 2A

NOTE: For best mounting results, place adhesive onto the desired surface with ONE attempt. Reapplying multiple times will not guarantee secure mounting onto the surface.

STEP 8

Smart RGB+IC LED Flex Light Strip Model: MLW7-1003 Input: 12V 2A

NOTE: For best mounting results, place adhesive onto the desired surface with ONE attempt. Reapplying multiple times will not guarantee secure mounting onto the surface.

STEP 9

Smart RGB+IC LED Flex Light Strip Model: MLW7-1003 Input: 12V 2A

NOTE: For best mounting results, place adhesive onto the desired surface with ONE attempt. Reapplying multiple times will not guarantee secure mounting onto the surface.

STEP 10
