

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS**EUT Housing and
Board View 1****EUT Housing and
Board View 2**

EUT Housing and Board View 3	 A photograph showing the EUT housing and board from a top-down perspective. The green printed circuit board (PCB) is positioned next to a black plastic housing. Both components are placed on a blue textured surface. A black ruler with white markings is visible at the bottom, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The PCB features various electronic components, including a large integrated circuit (IC) labeled 'AT94V-0' and several smaller components. The housing is a black, elongated, oval-shaped component with a central circular opening.
Solder Board-Component View 1	 A photograph showing the solder board-component from a top-down perspective. The green printed circuit board (PCB) is positioned on a blue textured surface. A black ruler with white markings is visible at the bottom, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The PCB features various electronic components, including a large integrated circuit (IC) labeled 'AT94V-0' and several smaller components. The board is oriented horizontally, and the ruler is placed vertically to the right of the board.

Solder Board-Component View 2	 A photograph of a green printed circuit board (PCB) component, likely an antenna, showing its soldered connections. The component is positioned next to a black ruler with white markings in millimeters. The ruler is oriented vertically, with the 0 mark at the bottom and the 100 mark at the top. The component is approximately 100 mm high and 20 mm wide. The solder joints are visible on the top surface of the component.
Antenna View	433.92MHz Antenna  A photograph of the same green PCB component from a different perspective, showing the underside. The component is positioned next to a black ruler with white markings in millimeters. The ruler is oriented vertically, with the 0 mark at the bottom and the 100 mark at the top. The component is approximately 100 mm high and 20 mm wide. The underside of the component shows various electronic components, including a microcontroller, capacitors, and a small antenna structure. A red line points from the text "433.92MHz Antenna" to the antenna structure on the component.
