

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 This photograph shows the back of the black, teardrop-shaped EUT housing. The internal components, including a green PCB, a battery, and various electronic components, are visible. A small label on the back of the housing reads: "Prestige Wireless Left-Hand Mouse Model No.: WTX21X02012975W Part No.: WTX21X02012975W Power Source: 2x AAA 1.5V (Not Included) Handheld: Laminated Poly-Shell (Plastic) Material: ABS". A ruler is placed horizontally below the housing for scale.
EUT Housing and Board View 2	 This photograph shows the front of the black, teardrop-shaped EUT housing. The internal components, including a green PCB, a battery, and various electronic components, are visible. A ruler is placed horizontally below the housing for scale.

Solder Board-Component View 1	 A photograph of a green printed circuit board (PCB) component, labeled 'Solder Board-Component View 1'. The component is irregularly shaped with various electronic components soldered onto it, including a large black integrated circuit (IC) on the left, a smaller IC in the center, and several surface-mount components. It is placed on a blue textured background. A black ruler with white markings is positioned vertically to the left of the component, showing measurements from 0 to 100 mm. A horizontal ruler is also visible at the bottom, showing measurements from 0 to 100 mm.
Solder Board-Component View 2	 A photograph of the same green PCB component, labeled 'Solder Board-Component View 2', showing a different side or a different component. The component is placed on the same blue textured background. A black ruler with white markings is positioned vertically to the left of the component, showing measurements from 0 to 100 mm. A horizontal ruler is also visible at the bottom, showing measurements from 0 to 100 mm.

Solder Board-Component View 3	 A photograph of a yellow PCB component, labeled 'Solder Board-Component View 3', placed on a blue textured surface. The component is irregularly shaped with a central cutout and features several electronic components: two black integrated circuits (ICs) with red markings, a small blue electrolytic capacitor, and a white multi-pin connector. A black ruler with white markings is positioned below the component, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).
Solder Board-Component View 4	 A photograph of a green PCB component, labeled 'Solder Board-Component View 4', placed on a blue textured surface. The component is irregularly shaped with a central cutout and features several electronic components: two black integrated circuits (ICs) with red markings, a small blue electrolytic capacitor, and a white multi-pin connector. A black ruler with white markings is positioned below the component, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).

Solder Board-Component View 5	 A photograph of a small, rectangular, gold-colored electronic component mounted on a blue textured surface. The component has two red LEDs on its top surface and two circular holes on its bottom surface. It is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters (mm) and centimeters (cm). The component is located between the 10 mm and 20 mm marks on the ruler.
Solder Board-Component View 6	 A photograph of a small, rectangular, green electronic component mounted on a blue textured surface. The component has two circular holes on its top surface and two circular holes on its bottom surface. It is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters (mm) and centimeters (cm). The component is located between the 10 mm and 20 mm marks on the ruler.
