TEST REPORT

The following sample(s) was/were submitted and identified on behalf of the client as:

Application No.:	GZEM1608005893CR	
Applicant:	Mattel Asia Pacific Sourcing Limited	
FCC ID:	PIYDXX02-16A5T	
Product Description:	BITTY BABY'S LIGHTS AND SOUNDS MONITOR	
Model No.:	DXX02T	
SKU number:	DXX02	
Product Design For:	Children 3+ years old	
Trade Mark:	American Girl	
Standards:	CFR 47 PART 15 Subpart C: 2014 section 15.249	
Date of Receipt:	2016-08-22	
Date of Test:	2016-08-31 to 2016-09-02	
Date of Issue:	2016-10-18	
Test Result :	Pass*	

* In the configuration tested, the EUT complied with the standards specified above.

The manufacturer should ensure that all products in series production are in conformity with the product sample detailed in this report. If the product in this report is used in any configuration other than that detailed in the report, the manufacturer must ensure the new system complies with all relevant standards.

The report must not be used by the client to claim product certification, approval, or endorsement by NVLAP, NIST, or any agency of the federal government. All test results in this report can be traceable to National or International Standards.

This document is issued by the Company subject to its General Conditions of Service printed overleaf, available on request or accessible at http://www.sgs.com/en/Terms-and-Conditions.aspxand,for electronic format documents, subject to Terms and Conditions for Electronic Documents at http://www.sgs.com/en/Terms-and-Conditions.aspxand,for electronic format documents, subject to Terms and Conditions for Electronic Documents at http://www.sgs.com/en/Terms-and-Conditions.aspxand,for electronic format documents, subject to Terms and Conditions for Electronic Documents at http://www.sgs.com/en/Terms-and-Conditions.Terms-e-Document.aspx. Attention is drawn to the limitation of liability, indemnification and jurisdiction issues defined therein. Any holder of this document is advised that information contained hereon reflects the Company's findings at the time of its intervention only and within the limits of Client's instructions, if any. The Company's sole responsibility is to its Client and this document does not exonerate parties to a transaction from exercising all their rights and obligations under the transaction documents. This document cannot be reproduced except in full, without prior written approval of the Company. Any unauthorized alteration, forgery or falsification of the content or appearance of this document is unlawful and offenders may be prosecuted to the fullest extent of the law. Unless otherwise stated the results shown in this test report refer only to the sample(s) tested and such sample(s) are retained for 30 days only.

	Applicant:	Mattel Asia Pacific Sourcing Limited
	Address of Applicant:	13/F., South Tower, World Finance Centre, Harbour City, Tsimshatsui, Kowloon, Hong Kong
5.2	General Description of	E.U.T.

5.2

Product Description:	BITTY BABY'S LIGHTS AND SOUNDS MONITOR
Model No.:	DXX02T

5.3 Details of E.U.T.

Operating Frequency	2427 MHz to 2449 MHz
Type of Modulation:	GFSK
Number of Channels	4
Antenna Type	integral antenna
Function:	Baby monitor with radio function and with 2.4GHz as carrier. (monitor part)
Power Supply:	DC 4.5 V size "AAA" batteries x 3 for monitor.
Power cord:	N/A

5.4 Description of Support Units

The EUT has been test as an independent unit.

5.5 Other Information Requested by the Customer

None.

5.6 **Deviation from Standards**

Biconical and log periodic antennas were used instead of dipole antennas.

Report No.: GZEM160800589301 Page: 6 of 29 FCC ID: PIYDXX02-16A5T

5.7 Test Location

All tests were performed at:

SGS-CSTC Standards Technical Services Co., Ltd., Guangzhou Branch EMC Laboratory, 198 Kezhu Road, Scientech Park, Guangzhou Economic & Technology Development District, Guangzhou, China 510663 Tel: +86 20 82155555 Fax: +86 20 82075059

No tests were sub-contracted.

5.6 Test Facility

The test facility is recognized, certified, or accredited by the following organizations:

• NVLAP (Lab Code: 200611-0)

SGS-CSTC Standards Technical Services Co., Ltd., Guangzhou EMC Laboratory is accredited by the National Voluntary Laboratory Accreditation Program (NVLAP/NIST). NVLAP Code: 200611-0.

The report must not be used by the client to claim product certification, approval, or endorsement by NVLAP, NIST, or any agency of the Federal Government.

• ACMA

SGS-CSTC Standards Technical Services Co., Ltd., EMC Laboratory can also perform testing for the Australian C-Tick mark as a result of our NVLAP accreditation.

• SGS UK(Certificate No.: 32), SGS-TUV SAARLAND and SGS-FIMKO

Have approved SGS-CSTC Standards Technical Services Co., Ltd., EMC Laboratory as a supplier of EMC TESTING SERVICES and SAFETY TESTING SERVICES.

• CNAS (Lab Code: L0167)

SGS-CSTC Standards Technical Services Co., Ltd., EMC Laboratory has been assessed and in compliance with CNAS-CL01:2006 accreditation criteria for testing laboratories (identical to ISO/IEC 17025:2005 General Requirements) for the Competence of Testing Laboratories.

• FCC (Registration No.: 282399)

SGS-CSTC Standards Technical Services Co., Ltd., EMC Laboratory has been registered and fully described in a report filed with the (FCC) Federal Communications Commission. The acceptance letter from the FCC is maintained in our files. Registration 282399, May 31, 2002.

• Industry Canada (Registration No.: 4620B-1)

The 3m/10m Alternate Semi-anechoic chamber of SGS-CSTC Standards Technical Services Co., Ltd., has been registered by Certification and Engineering of Industry Canada for radio equipment testing with Registration No. 4620B-1.

• VCCI (Registration No.: R-2460, C-2584, G-449 and T-1179)

The 10m Semi-anechoic chamber and Shielded Room of SGS-CSTC Standards Technical Services Co. Ltd. have been registered in accordance with the Regulations for Voluntary Control Measures with Registration No.: R-2460, C-2584, G-449 and T-1179 respectively.

• CBTL (Lab Code: TL129)

SGS-CSTC Standards Technical Services Co., Ltd., E&E Laboratory has been assessed and fully comply with the requirements of ISO/IEC 17025:2005, the Basic Rules, IECEE 01 and Rules of procedure IECEE 02, and the relevant IECEE CB-Scheme Operational documents.

7 Test Results

7.1 E.U.T. Operation

Test Voltage:	DC 4.5 V by "AAA" batteries x 3
Temperature:	20.0 -25.0 °C
Humidity:	38-50 % RH
Atmospheric Pressure:	1000 -1010 mbar

Test frequencies andAccording to the 15.31(m) Measurements on intentional radiators orfrequency range:receivers, other than TV broadcast receivers, shall be performed and, ifrequired, reported for each band in which the device can be operatedwith the device operating at the number of frequencies in each bandspecified in the following table:

According to the 15.33 (a) For an intentional radiator, the spectrum shall be investigated from the lowest radio frequency signal generated in the device, without going below 9 kHz, up to at least the frequency shown in the following table:

Number of fundamental frequencies to be tested in EUT transmit band

Frequency range in which	Number of	Location in frequency range
device operates	frequencies	of operation
1 MHz or less	1	Middle
1 MHz to 10 MHz	2	1 near top and 1 near bottom
Mara then 10 Mile	2	1 near top, 1 near middle and 1
More than 10 MHz	3	near bottom

Frequency range of radiated emission measurements

Lowest frequency generated in the device	Upper frequency range of measurement
9 kHz to below 10 GHz	10th harmonic of highest fundamental frequency or to 40 GHz,
	whichever is lower
At or above 10 GHz to below	5th harmonic of highest fundamental frequency or to 100 GHz,
30 GHz	whichever is lower
At or above 30 GHz	5th harmonic of highest fundamental frequency or to 200 GHz,
At of above 30 GHZ	whichever is lower, unless otherwise specified

Report No.: GZEM160800589301 Page: 10 of 29 FCC ID: PIYDXX02-16A5T

EUT channels and frequencies list:

Channel	Frequency (MHz)
1	2427
2	2437
3	2447
4	2449

Test frequencies are the lowest channel: 1 channel(2427 MHz), middle channel: 2 channel(2437 MHz) and highest channel: 4 channel(2449 MHz)

Report No.: GZEM160800589301 Page: 11 of 29 FCC ID: PIYDXX02-16A5T

7.2 Antenna Requirement

Standard requirement

15.203 requirement:

For intentional device. According to 15.203. an intentional radiator shall be designed to

Ensure that no antenna other than that furnished by the responsible party shall be used with the device.

EUT Antenna

The antenna is an ISM Band Planar PCB Antenna integrated on the main PCB and no consideration of replacement. The best case gain of the antenna is 0.5dBi.

Test result: The unit does meet the FCC requirements.

Report No.: GZEM160800589301 Page: 12 of 29 FCC ID: PIYDXX02-16A5T

7.3 Field Strength of Fundamental& Field Strength of Unwanted Emissions& Band Edge

Test Requirement:

FCC Part15 C section 15.249

(a) Except as provided in paragraph (b) of this section, the field strength of emissions from intentional radiators operated within these frequency bands shall comply with the following:

	Fundamental Frequency (MHz)	Field Strength of Fundamental (dBμV/m @ 3m)	Field Strength of Harmonics (dBμV/m @ 3m)					
	902 to 928	94.0	54.0					
	2400 to 2483.5	94.0	54.0					
	5725 to 5875	94.0	54.0					
	24000 to 24250	108.0	68.0					
	(d) Emissions radiated out harmonics, shall be atten fundamental or to the ge whichever is the lesser att	nuated by at least 50 dl eneral radiated emission	B below the level of the					
Limits:	The fundamental frequency rang is in the frequency band of the EUT is 2427 MHz ~ 2449 MHz.							
	The limit for Average field strength dB μ V/m for the fundamental frequence 94.0 dB μ V/m. The limit for Peak field strength dB μ V/m for the fundamental frequence 114.0 dB μ V/m.							
	No fundamental is allowed	d in the restricted bands.

Report No.: GZEM160800589301 Page: 13 of 29 FCC ID: PIYDXX02-16A5T

Test Procedure:

1)9 kHz to 30 MHz emissions:

For testing performed with the loop antenna, testing was performed in accordance to ANSI C63.10. The centre of the loop was positioned 1 m above the ground and positioned with its plane vertical at the specified distance from the EUT, During testing the loop was rotated about its vertical axis for maximum response at each azimuth and also investigated with the loop positioned in the horizontal plane.

2)30 MHz to 1 GHz emissions:

For testing performed with the bi-log type antenna, testing was performed in accordance to ANSI C63.10. The measurement is performed with the EUT rotated 360°, the antenna height scanned between 1m and 4m, and the antenna rotated to repeat the measurement for both the horizontal and vertical antenna polarizations.

3)1 GHz to 25 GHz emissions:

Test site with RF absorbing material covering the ground plane that met the site validation criterion called out in CISPR 16-1-4:2010 was used to perform radiated emission test above 1 GHz.

For testing performed with the horn antenna, testing was performed in accordance to ANSI C63.10. The measurement is performed with the EUT rotated 360^e, the antenna height scan between 1m and 4m, and the antenna rotated to repeat the measurement for both the horizontal and vertical antenna polarizations.

4): The EUT is 100% duty cycle and keep in continuous emission during testing.

Report No.: GZEM160800589301 Page: 14 of 29 FCC ID: PIYDXX02-16A5T

Test Configuration:

1) 9 kHz to 30 MHz emissions:

Report No.: GZEM160800589301 Page: 15 of 29 FCC ID: PIYDXX02-16A5T

2) 30 MHz to 1 GHz emissions:

3) 1 GHz to 25 GHz emissions:

The field strength is calculated by adding the Antenna Factor, Cable Loss & Per-amplifier. The basic equation with a sample calculation is as follows:

Final Test Level = Receiver Reading + Antenna Factor + Cable Loss - Preamplifier Factor

2483.500	28.28	7.07	39.14	52.45	48.66	54	-5.34	Н

Remark:

1). The field strength is calculated by adding the Antenna Factor. Cable Factor & Preamplifier. The basic equation with a sample calculation is as follows:

Final Test Level = Receiver Reading + Antenna Factor + Cable Loss – Preamplifier Factor.

- 2). As shown in Section, for frequencies above 1000 MHz. the above field strength limits are based on average limits. However, the peak field strength of any emission shall not exceed the maximum permitted average limits specified above by more than 20 dB under any condition of modulation.
- 3). The test only perform the EUT in transmitting status since the test frequencies were over 1GHz only required transmitting status.
- 4). For Radiated Emissions fall in the restricted bands (2400MHz is worse case than 2390MHz and report it as above), which set out in Section 15.205 Restricted bands.

Also there is not any other emission which falls in restricted bands can be detected and reported.

Test result: The unit does meet the FCC requirements.

Report No.: GZEM160800589301 Page: 27 of 29 FCC ID: PIYDXX02-16A5T

7.4 Occupied Bandwidth

Test Requirement:	FCC Part 15 C section 15.215(c)				
	Intentional radiators operating under the alternative provisions to the general emission limits, as contained in §§ 15.217 through 15.257 and in Subpart E of this part, must be designed to ensure that the 20 dB bandwidth of the emission, or whatever bandwidth may otherwise be specified in the specific rule section under which the equipment operates, is contained within the frequency band designated in the rule section under which the equipment to contain the designated bandwidth of the emission within the specified frequency band includes the effects from frequency sweeping, frequency hopping and other modulation techniques that may be employed as well as the frequency stability of the transmitter over expected variations in temperature and supply voltage. If a frequency stability is not specified in the regulations, it is recommended that the fundamental emission be kept within at least the central 80% of the permitted band in order to minimize the possibility of out-of-band operation.				
Test Method:	ANSI C63.10: Clause 6.9.				
	Operation within the band 2.400 to 2.4835 GHz				
Method of measurement:	A small sample of the transmitter output was fed into the Spectrum Analyzer and the attached plot was taken.				

Report No.: GZEM160800589301 Page: 28 of 29 FCC ID: PIYDXX02-16A5T

1.Test in the lowest frequency 2.427 GHz

This document is issued by the Company subject to its General Conditions of Service printed overleaf, available on request or accessible at http://www.sgs.com/en/Terms-and-Conditions.aspx.and.for electronic format documents, subject to Terms and Conditions for Electronic Documents at http://www.sgs.com/en/Terms-en-Document.aspx.attention is drawn to the limitation of liability, indemnification and jurisdiction issues defined therein.
