Safety instructions for use

To avoid heating cables, keep the volume at a moderate level. Listening too much at loud volume levels for prolonged periods of time may cause permanent hearing loss or "hearing loss." Do not use TRC-522 when it is unsafe to do so. For example, do not exercise, cycling, driving a road, or any activity will require your attention and ability to hear.

Warning: If you are watching while using your earbuds, you may be slightly out of sync with your device.

CC Warning
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

Interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/television technician for help.

NOTE: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
