Subj: AIS; NEW PRIVATE LABELS

We have reviewed the materials you have submitted with your email dated February 17, 2020 requesting an approval of the em-trak AIS Class B B200 & B212 modules. These units meet the requirements of the applicable international standards. The Certificate of Approvals (COAs) are enclosed.

The new equipment COAs will remain valid for five years, unless we suspend, withdraw, or terminate it. Terms of approval are on the reverse of the certificate. Any changes or alternation of components, construction or manufacturing location of the product may require a product to undergo additional testing, or requalification in order to keep its approval.

The New Private Label approvals (for relabeling previously approved equipment) remain valid until the expiration date unless our office suspends, withdraws, or terminates it.

You may apply for extension of these certifications by writing to our office before they expire. If the equipment is no longer produced our office continues to consider it certified based on the date of manufacture, the vessel installation date, and the valid certification for that time period. You cannot transfer this certification to another manufacturer without written authorization from our office. You must notify our office in writing when you make any change in the design or construction of the device or when you cease manufacturing the device.
