Information about the Applicant	
Grantee (Company Name)	Boston Scientific Corporation
FCC Contact Person	James Kippola
Address	4100 Hamline Avenue N.
City, State, Zip	St. Paul, MN 55112-5798
Job Number	BSTN0554
Model	6290 Latitude™ Communicator
FCC ID	ESCCRM629013
Agent	Peter Musto
Approval Type	Class II Permissive Change
Equipment Class	TNB Licensed Non-Broadcast Base Station Transmitter
Rule Part	95I

Overview

This application is for a class 2 permissive change to the model 6290 Latitude Communicator. The change is to the software in order to increase the power in the 402.82 - 403.51 frequency band to 21.9 uW. FCC inquiry and tracking number 424557 shows that the FCC granted permission for this software change. The change does not violate the output power of the existing FCC grant, which allows 21.9 uW output power. No changes were made to the existing hardware or frequency ranges. Additional testing was completed to demonstrate compliance of the device with the changes.

RF Exposure conditions have not changed, since the original report used 21.9 uW e.i.r.p output power for the basis of calculations.

Confidentiality requested for allowed files. Request is properly addressed and referenced.

No short term confidentiality requested.

Recommendation

All items have been resolved and completed to my satisfaction; therefore I recommend this application for approval.
