

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the disassembled components of an Electronic Under Test (EUT). The main housing is black and semi-circular. A green printed circuit board (PCB) is visible inside, populated with various electronic components and connected to several colored wires (red, yellow, green, blue). Two other black plastic parts, likely the lid and a small bracket, are also shown. A black ruler with white markings is placed vertically and horizontally for scale, indicating the size of the components in millimeters.
Solder Board-Component View 1	 A close-up photograph of the green PCB from the previous view. The board is populated with numerous surface-mount components, including integrated circuits, resistors, and capacitors. Two white connectors are visible on the left side. A black ruler with white markings is placed vertically and horizontally for scale, showing the dimensions of the board and its components in millimeters.

Solder Board-Component View 2	 A photograph of a green printed circuit board (PCB) component, likely a radio module, resting on a blue textured surface. The component is semi-circular and features various electronic components, including a small LCD screen, several circular inductors, and surface-mount components. A black ruler with white markings is placed vertically to the left of the component, showing measurements from 10 to 60 mm. The component is positioned between the 10 mm and 60 mm marks.
Antenna View	 A photograph of a black handheld device, possibly a walkie-talkie or a similar communication device, resting on a blue textured surface. The device has a small LCD screen and several buttons. A red rectangular box highlights the antenna area on the right side of the device. A red line points from the word "Antenna" in a red box to the highlighted area.
