

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

**EUT Housing and Board
View 1****EUT Housing and Board
View 2**

Solder Board-Component View 1	 A photograph showing the top view of a small electronic component assembly. The assembly consists of a yellow PCB with various components soldered to it, including two black connectors, two white RCA connectors, and a small black component. The PCB is labeled with "BK-109TSL", "REV:1.2 94V0", and "RCA1". The assembly is placed next to a metal ruler for scale, with the ruler showing centimeters and millimeters.
Solder Board-Component View 2	 A photograph showing the bottom view of the same electronic component assembly. The assembly consists of a green PCB with various components soldered to it, including two black connectors, two white RCA connectors, and a small black component. The PCB is labeled with "BK-109TSL", "REV:1.2 94V0", and "RCA1". The assembly is placed next to a metal ruler for scale, with the ruler showing centimeters and millimeters.

Solder Board-Component View 3	 A photograph showing the solder side of a yellow PCB component. The component is rectangular and features two black connectors at the top, a circular component on the right, and two white connectors at the bottom. It is placed on a blue background next to a metal ruler with millimeter and centimeter markings. The component's dimensions are approximately 4.5 cm in length and 1.5 cm in width.
Solder Board-Component View 4	 A photograph showing the solder side of a green PCB component. The component is rectangular and features numerous silver solder points arranged in a grid-like pattern. It is placed on a blue background next to a metal ruler with millimeter and centimeter markings. The component's dimensions are approximately 4.5 cm in length and 1.5 cm in width.

Solder Board-Component View 5	 A photograph of a small green printed circuit board (PCB) component, labeled '5', positioned next to a metal ruler. The ruler has markings in centimeters (0 to 7) and millimeters (0.5 mm to 7 mm). The component is rectangular with several soldered connections and two circular pads. The background is a light blue textured surface.
Solder Board-Component View 6	 A photograph of a small yellow printed circuit board (PCB) component, labeled '6', positioned next to a metal ruler. The ruler has markings in centimeters (0 to 7) and millimeters (0.5 mm to 7 mm). The component is rectangular with a black component in the center, a white connector on the right, and two circular pads on the left. The background is a light blue textured surface.

Solder Board-Component View 7	 A photograph of a green printed circuit board (PCB) with various electronic components. The board is positioned horizontally next to a metal ruler for scale. The ruler shows centimeters from 1 to 15 and millimeters from 0.5 to 18. The PCB features several connectors, including a multi-pin connector on the left, a BNC connector in the center, and a D-sub connector on the right. There are also several surface-mount components, including a large electrolytic capacitor and various resistors. The text "BK-108-MA" and "20200515" are visible on the board.
Solder Board-Component View 8	 A photograph of the same green PCB from a different perspective, showing the underside. The board is positioned horizontally next to a metal ruler for scale. The ruler shows centimeters from 1 to 15 and millimeters from 0.5 to 15. The underside of the PCB shows the solder pads and components from the other side, including a large electrolytic capacitor and various resistors. The text "BK-108-MA" and "20200515" are visible on the board.
