05. Do not disassemble the product. Take it to a qualified 04. Do not use an adapter with an output of 5V=1A (5W) or service person when service or repair is required. Incorrect reassembly may result in a risk of fire or injury to persons. 05. Wireless chargers make charging more convenient than 06. For safety reasons, please do not drop the product. Do not wired chargers, but due to current wireless technology limitations, the charging speed is slower than wired use this product in high temperature or humid environments to prevent short circuits. 07. During charging, this product may generate heat. This is normal, please do not worry. If overheating occurs, please stop using it temporarily. 06. High temperatures can reduce charging speed and limit power, which is a common issue with all wireless chargers. It is recommended to charge your device in environments with temperatures below 25°C / 77°F. 08. After fully charging, please unplug the charger plug in a timely manner to avoid damaging the battery due to 07. The phone case and the position of your device on the prolonged charging. wireless charger will affect the charging speed. The further the device is from the center of the wireless charger, the 09. In normal conditions, the battery performance will decline over several years. 08. For optimal charging performance, align your smartphone with the coil in the center of the wireless charger. If the charging icon does not appear on your smartphone, adjust its placement. Ensure the smartphone is always centered 10. Do not place the product in high temperatures or fire. Avoid

exposing the product to environments with temperatures exceeding 40°C, as this may result in overheating, fire, or If the power bank emits any unusual smell, overheats, changes color, or deforms, please stop using it immediately.

12. Do not use harmful chemicals or detergents to clean this

13. Misuse, dropping, or excessive abrasion may cause product 14. Do not damage or puncture the casing of the power bank. This may cause overheating, fire, or explosion.

Caution

This product is equipped with a built-in lithium battery, and please pay attention to the followings: 01. Please charge the product in time when the battery is low. If the product is not used for long periods of time, charge and discharge it once every three months to prevent battery

damage. 02. Do not disassemble, hit, squeeze, or throw into fire, If severe swelling occurs, stop using it. Do not place it in high temperature environments. If the battery life significantly shortens, stop using it and seek professional maintenance 03. If the wrong type of battery is used, there is a risk of explosion, fire, etc.

04. The battery (battery pack or assembled battery) should not be exposed to high temperatures such as direct sunlight or

05. Products containing built-in batteries should be separated from household waste when discarded. Take this product to an appropriate waste collection center for recycling and do not discard it casually.

06. When disposing of used batteries, keep batteries of different electrochemical systems separate from each other.

07. Note that a discharged battery may cause fire or smoke. Insulate the terminals with tape.

All products bearing this symbol are waste electrical and

electronic equipment which should not be mixed with unsorted household waste. Instead, you should protect human health and

the environment by handing over your waste equipment to a

and electronic equipment, appointed by the government or la authorities. Correct disposal and recycling will help prevent

human health. Please contact the installer or local authorities
