

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. On the left, a piece of electronic equipment, likely a spectrum analyzer or a noise meter, sits on a light-colored wooden table. A power cord connects it to a power strip on the wall. Below the table, a large, silver, rectangular device, possibly a power supply or a line impedance stabilization network (LISN), is connected to the power strip and the equipment. To the right, another wooden table holds a small pink object, possibly a test fixture or a component, connected to the same power strip.
Radiation Emission Test Setup (Below 30MHz)	 A photograph showing a radiation emission test setup. The room is lined with white, square-shaped electromagnetic shielding tiles. In the center, a yellow, rectangular test chamber sits on a metal stand. A blue metal frame is positioned in front of the chamber. The floor is dark and reflective, with yellow and black striped safety tape marking a path. A small pink object is visible on top of the yellow chamber.

**Radiation Emission Test
Setup (30MHz to 1GHz)**

**Radiation Emission Test
Setup (1GHz to 18GHz)**

**Radiation Emission Test
Setup (Above 18GHz)**
