

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. On the left, a wooden workbench holds a spectrum analyzer. A power line filter is connected to the power supply of a device under test (DUT), which is placed on the floor between two workbenches. The DUT is a rectangular metal box with a red terminal. A power strip is visible on the wall behind the workbenches.
Radiation Emission Test View (30MHz to 1GHz)	 A photograph showing a radiation emission test setup. A device under test (DUT) is placed on a turntable in the center of an anechoic chamber. The chamber walls are covered with white, square-shaped electromagnetic wave absorbers. The floor is metallic and has yellow and black safety markings. A metal railing is visible on the right side of the chamber.
