RE: Netgear

FCC ID: PY3MA401RD

Thank you very much for the SAR report. We have, however, a couple additional comments.

- 1.) The supplied Manual makes reference to 20cm separation distance between the device and all persons. This is now incorrect because of the SAR testing. Please correct manual.
- 2.) A Modular approval is additionally requested for this device. Please provide separate installation instructions showing how OEM integrators should incorporate this device into their products. Please carefully consider how OEM integration should affect RF Exposure issues.
- 3.) Please describe in greater detail how this device was tested to insure compliance with the radiated "band edge" restrictions of 15.205, especially with the band edge below 2390 and above 2483.5MHz.

William H. Graff
President and Examining Engineer
