

## REQUEST FOR NON-ROUTINE LABEL PLACEMENT

December 20, 2006

To: Federal Communications Commission  
Equipment Authorization Branch  
Laboratory Division  
Office of Engineering and Technology  
7435 Oakland Mills Road  
Columbia, Maryland 21046

Subject: Data for FCC Certification under Part 95

Applicant: Uniden America Corporation  
181 N. Country Club Road, P.O. Box 580  
Lake City, South Carolina 29560  
James R. Haynes, Vice President, Engineering and Regulatory Affairs

TYPE OF EQUIPMENT: FRS/GMRS Hand Held Transmitter  
FCC IDENTIFIER: AMWUT024

Dear Sir or Madam:

Please accept the FCC Identifier label placement to be located within the battery compartment of the referenced device. The reason for this request is due to the physical size of the device and the limited space available for the label placement on the outside of the housing.

Batteries are not installed within the device when it is packaged for marketing. The device is not operational without the batteries. Since the device only becomes operational after the user installs the batteries, the battery compartment must be opened prior to the initial operation. The FCC Identifier is clearly visible when the battery compartment is opened. Therefore, the device is in compliance with the Commission's rules under the provisions of Part 2.925(d).

Please contact the undersigned if you have any questions or need any further information.

Regards,

A handwritten signature in black ink that reads "James R. Haynes". The signature is stylized with a large, looped initial "J" and a cursive script.

James R. Haynes  
Vice President, Engineering and Regulatory Affairs
