RE: Ambit Microsystems

FCC ID: MCLT60H656

I have a few short comments on this Application.

- 1.) There are references to six antennas in this Application. Please identify them by type (dipole, inverted "F", etc.) and their respective gain.
- 2.) Please show RF Exposure information for highest gain antenna of each type.
- 3.) Please provide language to be included in Manual showing the requirements of 15.21.
- 4.) Which antenna was used for the radiated band edge test of 4.6.6? I am unsure of which one was utilized during testing.

William H. Graff
President and Examining Engineer
