FCC Part 15 Information and Notices

The device may cause TV or radio interference if used in close proximity to receiving equipment. The FCC can require you to stop using the mobile device if such interference cannot be eliminated.

- Any device that uses Bluetooth or Wi-Fi, or any device with a power supply is subject to FCC Part 15. FCC Part 15 covers both intentional radiators (Bluetooth and Wi-Fi) and unintentional radiators (such as emissions from power supplies and circuit boards).
- This device complies with part 15 of the FCC Rules. Pursuant to part 15.21 of the FCC Rules, you are cautioned that changes or modifications not expressly approved by Samsung could damage your product. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
- This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate RF energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

- If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
 - Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help.
- **Pacemaker and implantable medical devices should have a** minimum separation of six (6) inches between a mobile device and an implantable medical device, such as a pacemaker or cardioverter defibrillator, to avoid potential interference with the medical device.
 - Persons who have such medical devices should:
 - ALWAYS keep the mobile device more than six (6) inches from their implantable medical device when the mobile device is turned ON, do not carry the mobile device in a breast pocket, use the ear opposite the implantable medical device to minimize the potential for interference.
 - Turn the mobile device OFF immediately if there is any reason

Pacemaker and implantable medical devices

CAUTION! Persons who have implantable medical devices should consult their health care provider before using mobile electronic devices. For more information, visit www.samsung.com/us/support/legal/mobile then select Health and Safety Information > FCC Part 15 Information and Notices

Terms and Conditions

Computing Displays Accessories Support

SmartThings Offers Outlet ↗

For
Business

This Product is subject to a binding Arbitration agreement between you and SAMSUNG ELECTRONICS AMERICA, INC. ("Samsung"). You can opt out of the agreement within 30 calendar days of the first consumer purchase (or use of application) by emailing optout@sea.samsung.com or calling 1-800-SAMSUNG (726-7864) and providing the applicable information. For complete terms and conditions that bind you and Samsung, refer to the "Arbitration Agreement" section of this document.

For specific provisions or legal information relating to your device, please refer to the printed Terms & Conditions included with your device, or visit www.samsung.com and use the model number to locate the product support page. This information was last updated November 2022.

Feedback

The full Arbitration Agreement, Standard Limited Warranty, End User License Agreement (EULA), and Health & Safety Information are also available on the device, in the Samsung legal section of Settings. The location depends on the device, and is usually in the "About device" or "About phone" or "About tablet" section, for example:

- Settings → About phone or About device or About tablet → Legal information → Samsung legal
- Or, use the Search feature to search for "Legal".

- ☐ Standard Limited Warranty
 - ☐ End User License Agreement
 - ☐ Health and Safety Information
 - ☐ Device and care, including HAC information
 - ☐ Standard Limited Warranty for Repair Parts

Radio Frequency (RF) Signals

The U.S. Food and Drug Administration (FDA) has published information for consumers relating to Radio Frequency (RF) exposure from mobile devices. The public is exposed to and our bodies absorb wide varieties of naturally occurring and human made radiation, including from mobile devices. For up-to-date information, please see "FDA Radiation-Emitting Products at www.fda.gov.

- Mobile devices communicate by receiving and transmitting radio waves, which carry digitized voice and data. These radio waves, or RF, are forms of radiation, which are generally viewed as harmless to humans.
- RF energy is a type of non-ionizing radiation. Other types of non-ionizing radiation include visible light, Bluetooth, Wi-Fi, television broadcast signals, infrared radiation (heat), and other forms of electromagnetic radiation with relatively low frequencies.
- The low levels of RF energy a mobile device transmits and receives are in the microwave frequency range. Exposure to low level RF energy does not produce heating effects and is not known to have adverse health effects. By contrast, ionizing radiation, which includes high-energy electromagnetic waves such as X-rays and gamma rays, heats tissue and may be harmful.
- While in stand-by mode, mobile devices also emit RF energy at substantially reduced time intervals.
- If you want to reduce exposure to RF energy, reduce the amount of time spent using your mobile device, use speaker mode or a headset to place more distance between your head and the mobile device, and increase the distance between mobile devices and your body.
- Hands-free function can be used for convenience and comfort, and it is legally required in many states if you want to use your device while driving.
- All handheld mobile devices must comply with FCC guidelines for exposure to RF energy. The FCC's guidelines were developed by expert scientists and engineers after extensive

review of scientific literature relating to RF exposure, and those guidelines incorporate prudent margins of safety.

- Accessories that have potential to influence the SAR characteristics of a mobile device require FCC approval. Such accessory products should be approved for your mobile device prior to use as they can modify the RF fields around the device. For more information, please refer to <https://apps.fcc.gov>.
- Some hands-free mobile device kits and accessories can generate RF energy when used in tandem with your mobile device.

Additional information on the safety of RF exposures from various sources can be obtained from the following organizations:

- FCC RF Safety Program: <https://www.fcc.gov>
- Environmental Protection Agency (EPA): <https://www.epa.gov/radtown/non-ionizing-radiation-wireless-technology>
- Occupational Safety and Health Administration (OSHA): <https://www.osha.gov>
- National Institute for Occupational Safety and Health (NIOSH): <https://www.cdc.gov>
- World Health Organization (WHO): <http://www.who.int>
- International Commission on Non-Ionizing Radiation Protection: <http://www.icnirp.de>
- US Food and Drug Administration: <http://www.fda.gov>

Feedback

Specific absorption rate

Specific Absorption Rate (SAR) certification establishes a minimum recommended distance from a person's body for safe operation of RF-emitting devices. Body-worn operations are restricted to belt-clips, holsters or similar accessories that have no metallic component in the assembly and must provide at least 1.5 cm (3/4 in.) separation between the device and the user's body. Samsung's Wireless Power Sharing feature allows device-to-device charging without the need for a charger. If your device supports the wireless charging or power sharing functions, this equipment should be operated with a minimum distance of 20 cm (8 in.) between the device and your body.

FCC Part 15 Information and Notices

The device may cause TV or radio interference if used in close proximity to receiving equipment. The FCC can require you to stop using the mobile device if such interference cannot be eliminated.

- Any device that uses Bluetooth or Wi-Fi, or any device with a power supply is subject to FCC Part 15. FCC Part 15 covers both intentional radiators (Bluetooth and Wi-Fi) and unintentional radiators (such as emissions from power supplies and circuit boards).
- This device complies with part 15 of the FCC Rules. Pursuant to part 15.21 of the FCC Rules, you are cautioned that changes or modifications not expressly approved by Samsung could damage your product.  - Consult the dealer or an experienced radio/TV technician for help.
- **Pacemaker and implantable medical devices should have a** minimum separation of six (6) inches between a mobile device and an implantable medical device, such as a pacemaker or cardioverter defibrillator, to avoid potential interference with the medical device.
 - Persons who have such medical devices should:
 - ALWAYS keep the mobile device more than six (6) inches from their implantable medical device when the mobile device is turned ON, do not carry the mobile device in a breast pocket, use the ear opposite the implantable medical device to minimize the potential for interference.

- Turn the mobile device OFF immediately if there is any reason to suspect that interference is taking place.
- Read and follow the directions from the manufacturer of your implantable medical device.
- If you have any questions about using your wireless mobile device with an implantable medical device, consult your health care provider. For additional detailed information regarding potential interference and precautions needed for pacemakers, please visit: <http://www.fda.gov>
- Remember to follow any special regulations in force in any area.
- Certain electronic equipment may not be shielded against the RF signals from your wireless mobile device. Consult the manufacturer to discuss alternatives.
- If you use any other personal medical devices, consult the manufacturer of your device to determine if it is adequately shielded from external RF energy.
- RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles. Check with the manufacturer or its representative regarding your vehicle before using your mobile device in a motor vehicle.
- Remember to follow any special regulations in force in any area, and always switch your mobile device off where posted notices require you to do so, or when it may cause interference or danger.
- Switch your mobile device off when in any area with a potentially explosive atmosphere and obey all signs and instructions. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death. Users are advised to switch the mobile device off while at a refueling point (service station).

settings, and the headphones that are used. As a result, there is no single volume setting that is appropriate for everyone or for every combination of sound, settings and equipment.

Use by children

- Children or other persons requiring supervision can accidentally choke on small device components or parts, especially if they have broken off.
- If a child or other person tries to suck on or bite the device, this can puncture the housing of the device and lead to water damage, for more information please see, <https://www.fcc.gov/consumers/guides/childrens-safety>

Cautions and Other Important Safety Information

- Any changes or modifications to your mobile device could damage your product and may not be covered by your warranty.
- Only qualified personnel should service the mobile device.
- When using a headset in dry environments, static electricity can build up in the headset and cause a small quick static electrical shock. To minimize the risk of electrostatic discharge
