

Request for Modular/Limited Modular Approval

Date: April 17, 2020					
Subject: Manufacturer's Declaration for	11	□ - Split Modula□ - Limited Spli		approval	
Confidentiality Request for: FCC ID	: 2AU3BU9W42				
	sic Requirements – FCC Part 15.212(a				
For Items Marked "NO(*)", the Limited Module Description Must be Filled Out on the Fo				llowing Pages Requirement Met	
1. The modular transmitter must have its own RF shielding. This is intended to ensure that the module does not have to rely upon the shielding provided by the device into which it is installed in order for all modular transmitter emissions to comply with FCC limits. It is also intended to prevent coupling between the RF circuitry of the module and any wires or circuits in the device into which the module is installed. Such coupling may result in non-compliant operation. The physical crystal and tuning capacitors may be located external to the shielded radio elements. 15.212(a)(1)(i)			⊠ - YES	□ - NO(*)	
Details: <the a="" contains="" metal="" module="" sh<br="">the board next to antenna connector></the>	ield which covers all RF components an	d circuitry. The shi	eld is located	on the top of	
2. The modular transmitter must have buffered modulation/data inputs (if such inputs are provided) to ensure that the module will comply with FCC requirements under conditions of excessive data rates or over-modulation. 15.212(a)(1)(ii)		⊠ - YES	□ - NO(*)		
Details: < The module has buffered modu	lation/data inputs.>				
3. The modular transmitter must have its own ensure that the module will comply with FC supplying circuitry in the device into which	CC requirements regardless of the design	of the power	⊠ - YES	□ - NO(*)	
Details: < The module has its own power	supply regulation.>				
4. The modular transmitter must comply with the antenna and transmission system requirements of §§ 15.203, 15.204(b), 15.204(c), 15.212(a), and 2.929(b). The antenna must either be permanently attached or employ a "unique" antenna coupler (at all connections between the module and the antenna, including the cable). The "professional installation" provision of § 15.203 is not applicable to modules but can apply to limited modular approvals under paragraph 15.212(b). 15.212(a)(1)(iv)				□ - NO(*)	
Details: < The antenna either be permane	ently attached. Because the antenna is fo	rmed on the substra	te pattern.>		
5. The modular transmitter must be tested in a inside another device during testing. This is complying with Part 15 emission limits reg. Unless the transmitter module will be batter requirements found in Section 15.207. AC of the module must not contain ferrites, unless 15.27(a)). The length of these lines shall be least 10 centimeters to insure that there is n equipment. Any accessories, peripherals, or shall be unmodified or commercially availa	intended to demonstrate that the module ardless of the device into which it is even by powered, it must comply with the AC lear DC power lines and data input/output learning they will be marketed with the module (elength typical of actual use or, if that len to coupling between the case of the module support equipment connected to the module support equipment equipm	is capable of tually installed. line conducted ines connected to see Section gth is unknown, at le and supporting dule during testing	⊠ - YES	□ - NO(*)	
Details: The module was tested stand-alon	e as shown in test setup photographs file	ed with this applicati	ion		

Modular Approval Requirement Requirement Met 6. The modular transmitter must be labeled with its own FCC ID number, or use an electron display (see KDB Publication 784748). If using a permanently affixed label with its own FCC ID number, if the FCC ID is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID: XYZMODEL1" or "Contains FCC ID: XYZMODEL1." Any similar wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application for equipment authorization, or, must provide adequate instructions along with the module which explain this ⊠ - YES requirement. In the latter case, a copy of these instructions must be included in the application for ☐ - NO(*) equipment authorization. If the modular transmitter uses an electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter or on the device in which it is installed. If the module is installed inside another device, then the outside of the device into which the module is installed must display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains FCC certified transmitter module(s)." Any similar wording that expresses the same meaning may be used. The user manual must include instructions on how to access the electronic display. A copy of these instructions must be included in the application for equipment authorization. 15.212(a)(1)(vi) Details: There is a label on the module as shown in the labeling exhibit filed with this application. Host specific labeling instructions are shown in the installation manual .filed with this application. The modular transmitter must comply with all specific rule or operating requirements applicable to the transmitter, including all the conditions provided in the integration instructions by the grantee. A copy of these instructions must be included in the application for equipment authorization. For example, there are very strict operational and timing requirements that must be met before a transmitter is 🛛 - YES ☐ - NO(*) authorized for operation under Section 15.231. For instance, data transmission is prohibited, except for operation under Section 15.231(e), in which case there are separate field strength level and timing requirements. Compliance with these requirements must be assured. 15.212(a)(1)(vii) Details: The module complies with FCC Part 15C requirements. Instructions to the OEM installer are provided in the installation manual filed with this application The modular transmitter must comply with any applicable RF exposure requirements. For example, FCC Rules in Sections 2.1091, 2.1093 and specific Sections of Part 15, including 15.319(i), 15.407(f), 15.253(f) and 15.255(g), require that Unlicensed PCS, UNII and millimeter wave devices perform routine environmental evaluation for RF Exposure to demonstrate compliance. In addition, spread 🛛 - YES spectrum transmitters operating under Section 15.247 are required to address RF Exposure compliance \square - NO(*) in accordance with Section 15.247(b)(4). Modular transmitters approved under other Sections of Part 15, when necessary, may also need to address certain RF Exposure concerns, typically by providing specific installation and operating instructions for users, installers and other interested parties to ensure compliance. 15.212(a)(1)(viii) Details: The module meets Portable exclusion levels as shown in the RF exposure information filed with this application.

Limited Module Description – When Applicable

* If a module does NOT meet one or more of the above 8 requirements, the applicant may request Limited Modular Approval (LMA). This Limited Modular Approval (LMA) is applied with the understanding that the applicant will demonstrate and will retain control over the final installation of the device, such that compliance of the end product is always assured. The operating condition(s) for the LMA; the module is only approved for use when installed in devices produced by grantee. A description regarding how control of the end product, into which the module will be installed, will be maintained by the applicant/manufacturer, such that full compliance of the end product is always ensured should be provided here.

product is always ensured should be p	provided here.					
Details: N/A (the module meets all the 8 requirements above.						
Software Considerations – KDB 594280 / KDB 442812 (One of the following 2 items must be applied)						
	Requirement		Requirement M	et		
 For non-Software Defined Radio transmitter modules where software is used to ensure compliance of the device, technical description must be provided about how such control is implemented to ensure prevention of third-party modification; see KDB Publication 594280. 			☐ - Provided in Separate Cover Letter	□ - N/A		
Details: < N/A >						
2. For <u>Software Defined Radio (SDR)</u> devices, transmitter module applications must provide a software security description; see KDB Publication 442812.			☐ - Provided in Separate Cover Letter	□ - N/A		
Details: < N/A>						
		ılar Requirements	D 11 11 14			
1 F	Requirement		Provided in Man	ual		
1. For split modular transmitters, specific descriptions for secure communications between front-end and control sections, including authentication and restrictions on third-party modifications; also, instructions to third-party integrators on how control is maintained.			☐ - Provided in Separate Cover Letter	□ - N/A		
Details: < N/A >						
Clear and Spe	cific Instructions Describi	nidance – KDB 996369 D03 ng the Conditions, Limitati ntegrate the module into a	ons, and Procedures			
Requirement						
Is this module intended for sale to third parties?	□ - YES	 ☑ - No, If No, and LMA applies, the applicant can optionally choose to not make the following detailed info public. However there still needs to be basic integration instructions for a users manual and the information below must still be included in the operational description. If the applicant wishes to keep this info confidential, this will require a separate statement cover letter explaining the module is not for sale to third parties and that integration instructions are internal confidential documents. 				
Item As of May 1, 2019, the FCC req applicants should include informati	uires ALL the following in	nual – See KDB 996369 D0 nformation to be in the inst	3, Section 2 allation manual. Modular tr	ansmitter		

As of May 1, 2019, the FCC requires ALL the following information to be in the installation manual. Modular transmitter applicants should include information in their instructions for all these items indicating clearly when they are not applicable. For example information on trace antenna design could indicate "Not Applicable". Also if a module is limited to only a grantees own products and not intended for sale to third parties, the user instructions may not need to be detailed and the following items can be placed in the operational description, but this should include a cover letter as cited above.

Mark and the second sec	
1. List of applicable FCC rules. KDB 996369 D03, Section 2.2	
a. Only list rules related to the transmitter.	
2. Summarize the specific operational use conditions. KDB 996369 D03, Section 2.3	
a. Conditions such as limits on antennas, cable loss, reduction of power for point to point systems, professional installation info	
3. Limited Module Procedures. KDB 996369 D03, Section 2.4	
a. Describe alternative means that the grantee uses to verify the host meets the necessary	
limiting conditions	☐ - All Items shown to
	the left are provided in
b. When RF exposure evaluation is necessary, state how control will be maintained such	the Modular Integration
that compliance is ensured, such as Class II for new hosts, etc.	Guide (or UM) for Full
4. Trace antenna designs. KDB 996369 D03, Section 2.5	Modular Approval (MA) or LMA.
a. Layout of trace design, parts list, antenna, connectors, isolation requirements, tests for	of Livin C.
design verification, and production test procedures for ensuring compliance. If confidential, the method used to keep confidential must be identified and information	☐ - An LMA applies
provided in the operational description.	and is approved ONLY
5. RF exposure considerations. KDB 996369 D03, Section 2.6	for use by the grantee in
a. Clearly and explicitly state conditions that allow host manufacturers to use the module.	their own products, and
Two types of instructions are necessary: first to the host manufacturer to define	not intended for sale to 3 rd parties as provided in
conditions (mobile, portable – xx cm from body) and second additional text needed to be provided to the end user in the host product manuals.	a separate cover letter.
6. Antennas. KDB 996369 D03, Section 2.7	Therefore the
a. List of antennas included in the application and all applicable professional installer	information shown to the
instructions when applicable. The antenna list shall also identify the antenna types	left is found in the
(monopole, PIFA, dipole, etc – note that "omni-directional" is not considered a type)	theory of operation.
 Label and compliance information. KDB 996369 D03, Section 2.8 a. Advice to host integrators that they need to provide a physical or e-label stating 	
"Contains FCC ID: " with their finished product	
8. Information on test modes and additional testing requirements. KDB 996369 D03, Section 2.9	
a. Test modes that should be taken into consideration by host integrators including	
clarifications necessary for stand-alone and simultaneous configurations.	
b. Provide information on how to configure test modes for evaluation 9. Additional testing, Part 15 Subpart B disclaimer. KDB 996369 D03, Section 2.10	
7. Additional testing, Fait 15 Subpart Datistianner. KDD 770507 D05, Section 2.10	
Sincerely	

Sincerely,
