

Dear Mr. Graff:

This is in response to your comments dated January 13, 2001.

1- The photos were taken in accordance to procedures.

However, we are
setting up the system again and photos shall be
submitted no later than
Saturday, January 20, 2001

4- Attached is the RF Exposure statement for Nokia
Card.

5- The band edge plots are shown on page 16 of the FCC
Report. These plots are antenna conducted output. The
restricted band at 2483.5 shows no emission level
measurable. Therefore no radiated data is provided.

The lower Band edge plots shows about 40 dB down from
the carrier with 100 kHz resolution bandwidth on the
spectrum analyzer.

Best regards,

Brian
