Request for a Modular Approval - FCC ID: DO4TR7240R

Dear Sirs,

Our client's module with the above FCC ID is seeking FCC authorization as a modular transmitter. The requirements of the FCC Public notice DA00-1407 and KDB 996369 are met. Please see the following comments: Please contact us if you have any additional questions.

Item	Requirements	EUT
1	Have its own RF shielding	The modular transceiver is constructed with its own RF shielding consisting of PCB shielding.
2	Have buffered modulation/data inputs (if such inputs are provided),	Data rates are controlled by the RF module and inputs are buffered by an incorporated microcontroller.
3	Have it own power supply regulation	The transceiver has its own power supply regulation.
4	Meet the antenna requirements of Section 15.203	The module does not utilize a permanent attached antenna nor does it use an unique antenna connector. The module is intended to be used strictly with the antennas listed as part of this certification and is installed by the manufacturer's personnel only.
5	Be tested in a stand-alone configuration, i.e., the antenna, AC or DC power and data input/output lines must be connected to the module but, the module must not be inside another case during testing	The module was tested with the host.
6	Be labelled with its own FCC ID number, and if the FCC ID is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module.	The final assembly is equipped with a permanent affixed label.
7	The modular transmitter is manufactured so that the user cannot influence the operation of the transmitter that will operate outside of the scope of the regulations.	The product containing the modular transceiver is assembled, controlled and installed by the applicant Checkpoint Systems, Inc.
8	Compliance with RF exposure requirements is the responsibility of the grantee and will be addressed for all final host configurations	The modular transceiver complies with all applicable RF exposure requirements in its final configuration.
