the Hornet 569T
system.*

PUT THE **STING** ON CRIME®

REPLACEMENT TRANSMITTER

Model 471H, 1 Button Learning Transmitter

The system comes with one programmed transmitter. The receiver can store up to 4 different transmitter codes in memory. Additional transmitters can be ordered by contacting your local dealer. Use

the following to add a transmitter to the system. The following is a basic sequence of steps to remember whenever programming transmitters:

1. **Fuses.** Remove both fuses from the control module fuse holders, then re-insert into the fuse holders.
2. **Key.** Turn the ignition to the ON position. The parking lights will turn On.
3. **Program.** Press and hold the program button on the control module. The parking lights will flash Off and then back On to acknowledge program mode.

Note: If the parking lights did not flash the transmitter learn was not successful. Return and repeat from step 1 this procedure.

To add additional transmitters (within 10-seconds of the first transmitter) press and hold the button on the additional transmitter.
