1 Introduction

Unictron's AA077 ceramic chip antenna is designed for Wi-Fi CERTIFIED ac applications, covering both 2400~2484 MHz & 5150~5850 MHz frequency bands. Fabricated with proprietary design and processes, AA077 shows excellent performance and is fully compatible with SMT processes which can decrease the assembly cost and improve device's quality and consistency.

Features

*Stable and reliable performances in both 2.4 and 5 GHz bands

*Low profile and compact size

*RoHS compliance

*SMT processes compatible

Applications

*Wi-Fi CERTIFIED ac applications

Tuning

* Wireless communication devices when IEEE802.11 a/b/g/n/ac functions are needed.

*IoT applications

* Wireless PCMCIA cards or USB dongles

2 Electrical Characteristics

2.1 Table with electrical properties:

Electrical Table (2400~2500 MHz Band)

Char	acteristics	Specifications	Unit
Outline Dimensi	ons	3.2x1.6x0.5	mm
Ground Plane Di	mensions	80x40	mm
Working Freque	ncy	2400~2500	MHz
VSWR (@center fr	requency)*	2 Max.	
Characteristic Im	npedance	50	Ω
Polarization		Linear Polarization	
Peak Gain		1.7 (typical)	dBi
Efficiency	(@2442MHZ)	78 (typical)	%

* Center frequency means the frequency with the lowest value in return loss of the chip antenna on the evaluation board.

Electrical Table (5150~5850 MHz Band)

Char	acteristics	Specifications	Unit
Outline Dimensi	ons	3.2x1.6x0.5	mm
Ground Plane		80x40	mm
Working Freque	ncy	5150~5850	MHz
VSWR (@center fr	equency)*	2 Max.	
Characteristic Im	pedance	50	Ω
Polarization		Linear Polarization	
Peak Gain		2.3 (typical)	dBi
Efficiency	(@55001VIHZ)	67 (typical)	%

* Center frequency means the frequency with the lowest value in return loss of the chip antenna on the evaluation board.

Frequency tuning 4

Regarding the frequency tuning, please contact Unictron representative at e-sales@unictron.com for layout details and more technical information

With the following recommended values of matching and tuning components, the center frequencies will be about 2442 MHz for lower band & 5500 MHz for higher band at our standard 80x40 mm2 evaluation board. However, these are typical reference values which may need to be changed when circuit boards or part vendors are different.

System Matching Circuit Component							
Location	Description	Vendor	Tolerance				
1	N/A	-	-				
2	1 nH <i>,</i> (0402)	DARFON	±0.3 nH				
3	0.2 pF, (0402)	DARFON	±0.05 pF				
4	22 pF, (0402)	DARFON	±5%				
5 Fine tuning element	1 pF, (0402)	DARFON	±0.05 pF				
6 Fine tuning element	0.2 pF, (0402)	DARFON	±0.05 pF

Notes

6.2 Operating and storage conditions:

Operating:	Storage:
Maximum Input Power: 2W	Storage Temperature -5C to 40 C
Operating Temperature: -40 C to 85 C	Relative Humidity: 20% to 70%
	Shelf Life: 1 year

6.3 Installation guide:

Request Unictron's application notes "General guidelines for the installation of Unictron's chip antennas" for further information at e-sales@unictron.com.

6.4Reminders for users of Unictron's AA077 ceramic chip antennas

6.4.1 This chip antenna is made of ceramic materials which are relatively more rigid and brittle compared to printed circuit board materials. Bending of circuit board at the locations where chip antenna is mounted may cause the cracking of solder joints or antenna itself.

6.4.2 Punching/cutting of the break-off tab of PCB panel may cause severe bending of the circuit board which may result in cracking of solder joints or chip antenna itself. Therefore break-off tab shall be located away from the installation site of chip antenna.

6.4.3 Be cautious when ultrasonic welding process needs to be used near the locations where chip antennas are installed. Strong ultrasonic vibration may cause the cracking of chip antenna solder joints.

Notes

Presented data were measured on reference PCB (ground) as shown in this specification. When the antenna placement or size of the PCB is changed, antenna performance and values of matching components may differ from data shown here.

Information presented in this Reference Specification is believed to be correct as of the date of publishing. Unictron Technologies Corporation reserves the rights to change the Reference Specification without notice due to technical improvements, etc. Please consult with Unictron's engineering team about the latest information before using this product. Per request, we may provide advice and assistance in implementing this antenna to a customer's device by simulation or real measurement of the interested device in our testing facilities.
