Subject: Correction to GSM 850 ERP measurement for the Certification Application of  
BlackBerry Wireless Handheld Model RAP40GW

Research In Motion Limited (RIM) herein is submitting a correction to GSM 850 ERP measurement for the Certification Application of BlackBerry Model RAP40GW currently on deferral.

An error in the tracking generator reading in the substitution stage for the ERP measurement of GSM 850, in Appendix 4, was made. Correction to the Annex 4 was made and the 2 page document was uploaded for your review. All the documents affected by this correction has been modified and uploaded to the ATCB web site. This supersedes the original ERP measurement for GSM 850 band. The corrected maximum ERP now is 1.135 Watt (30.55 dBm).

Please do not hesitate to contact the undersigned should you require additional information or have any questions.

Yours truly,
