Precautions for use

1. Headphones should be stored in a dry and ventilated environment to avoid contact with oil, water vapor, steam, moisture and dust, so as not to affect product performance.
2. Avoid using irritating, organic solvents or items containing these ingredients to clean the headphones.
3. The earphones should be correctly and professionally used according to the requirements. Pay attention to the influence of the use environment on the headphones. To ensure the smooth connection, it is recommended that the distance between the mobile phone and the earphones be within 10 meters.
4. If the headset is not connected or the communication is not smooth, etc., please do not disassemble the headset body and its accessories, otherwise it will not be guaranteed.
5. Charge the earphone compartment, please use the standard car charger or the charger specified by the company.
6. To ensure that you use the headset normally, make sure that the headset is fully charged.

FCC STATEMENT :

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

RF warning statement:

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
