Date: April 9, 2025 Page: 28 / 66

#### Note:

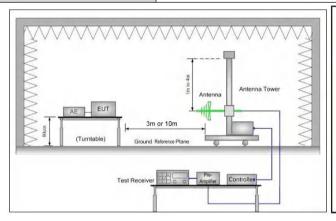

- 1. The Measurement (Result Level) is calculated by Reading Level adding the Correct Factor(maybe including Ant.Factor and the Cable Factor etc.), The basic equation is as follows:
  - Result Level= Reading Level + Correct Factor(including Ant.Factor, Cable Factor etc.)
- 2. The amplitude of 9KHz to 30MHz spurious emission that is attenuated by more than 20dB below the permissible limit has no need to be reported.
- 3. The amplitude of 18GHz to 25GHz spurious emission that is attenuated by more than 20dB below the permissible limit has no need to be report.
- 4. All channels had been pre-test, DH5 is the worst case, only the worst case was reported.

Report No.: DNT2504010755R3025-03413 Date: April 9, 2025 Page: 29 / 66

## 3.10 Restricted bands around fundamental frequency

Test Requirement:	47 CFR Part 15C Section 1	47 CFR Part 15C Section 15.209 and 15.205								
Test Method:	ANSI C63.10: 2013 Section	ANSI C63.10: 2013 Section 11.12								
Test Site:	Measurement Distance: 3m	Measurement Distance: 3m or 10m (Semi-Anechoic Chamber)								
Limit:	Frequency	Limit (dBuV/m)	Remark							
	30MHz-88MHz	40.0	Quasi-peak							
	88MHz-216MHz	43.5	Quasi-peak							
	216MHz-960MHz	46.0	Quasi-peak							
	960MHz-1GHz	54.0	Quasi-peak							
	Above 4011=	54.0	Average Value							
	Above 1GHz	74.0	Peak Value							
Test Setup:										

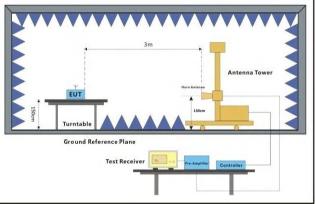

Figure 1. 30MHz to 1GHz

Figure 2. Above 1 GHz

#### Test Procedure:

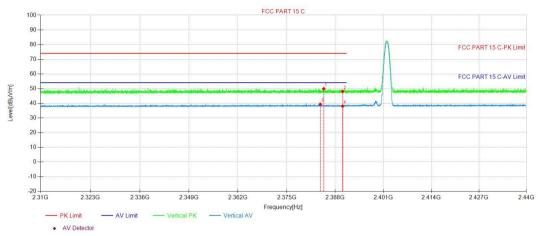

- a. For below 1GHz, the EUT was placed on the top of a rotating table 0.8 meters above the ground at a 3 or 10 meter semi-anechoic camber. The table was rotated 360 degrees to determine the position of the highest radiation.
- b. For above 1GHz, the EUT was placed on the top of a rotating table 1.5 meters above the ground at a 3 meter semi-anechoic camber. The table was rotated 360 degrees to determine the position of the highest radiation.
- c. The EUT was set 3 or 10 meters away from the interference-receiving antenna, which was mounted on the top of a variable-height antenna tower.
- d. The antenna height is varied from one meter to four meters above the ground to determine the maximum value of the field strength. Both horizontal and vertical polarizations of the antenna are set to make the measurement.
- e. For each suspected emission, the EUT was arranged to its worst case and then the antenna was tuned to heights from 1 meter to 4 meters and the rotatable table was turned from 0 degrees to 360 degrees to find the maximum reading.
- f. The test-receiver system was set to Peak Detect Function and Specified Bandwidth with Maximum Hold Mode.
- g. Place a marker at the end of the restricted band closest to the transmit frequency to show compliance. Also measure any emissions in the restricted bands. Save the spectrum analyzer plot. Repeat for each power and modulation for lowest and highest channel
- n. Test the EUT in the lowest channel, the Highest channel
- i. The radiation measurements are performed in X, Y, Z axis positioning for Transmitting mode, And found the X axis positioning which it is worse case.
- . Repeat above procedures until all frequencies measured was complete.

Report No.: DNT	2504010755R3025-03413 Date: April 9, 2025 Page: 30 / 66
Test Configuration:	Measurements Below 1000MHz  • RBW = 120 kHz  • VBW = 300 kHz  • Detector = Peak  • Trace mode = max hold  Peak Measurements Above 1000 MHz  • RBW = 1 MHz  • VBW ≥ 3 MHz  • Detector = Peak  • Sweep time = auto  • Trace mode = max hold  Average Measurements Above 1000MHz  • RBW = 1 MHz  • VBW = 1 MHz  • VBW = 10 Hz, when duty cycle is no less than 98 percent.  • VBW ≥ 1/T, when duty cycle is less than 98 percent where T is the minimum  transmission duration over which the transmitter is on and is transmitting at its
Exploratory Test Mode:	maximum power control level for the tested mode of operation.  Transmitting with all kind of modulations, data rates.
	Transmitting mode.
Final Test Mode:	Pretest the EUT Transmitting mode. Through Pre-scan, find the DH5 of data type is the worst case of all modulation type. Only the worst case is recorded in the report.
Instruments Used:	Refer to section 2.9 for details
Test Results:	Pass
