McLean, VA 22101

Gentlemen:

The attached documentation is provided in support of a formal submission to your organization for FCC certification of an intentional unlicensed transmitter. On behalf of our client, Compatible Electronics, Inc. has included an application for a Grant of Equipment Authorization pursuant to Subpart C of part 15 of FCC Rules (47 CFR) regarding intentional radiators. The data within the test report demonstrates the equipment was tested in a manner described under Part 2 and 15 of the Code of Federal Regulations.

The submittal is for approval of the Intel Mini PCI Type 802.11BG Wireless LAN Adapter. This particular EUT already has modular approval under the FCC-ID: PD9WM3B2200BG. The grant required a separation distance of at least 20 cm from all persons.

We are requesting a Limited Modular Approval (LMA) on the Intel Mini PCI Type 802.11 BG Wireless LAN Adapter for portable purposes to cover the Hewlett Packard platforms PP2080 and PP3006. Both platforms have had the SAR testing performed on them.

The Series PP2080 and PP3006 also have Bluetooth Modules inside of them that are approved under the FCC-ID: LNQBTM200. The test report enclosed is used for all current HP platforms which include the PP2080 and PP3060.

If you have any questions or need any additional information, please give me a call at (714) 579-0500.

Sincerely,

Kyle Fujimoto
Test Engineer
