

Technical Information for CD-ROM drive Model XM-6602B

1. Kind of equipment : Class B Computing Device Peripheral
(Compact Disc - Read Only Memory drive)

2. Specifications

1) Generated Frequency : Location

X101 33.86 MHz

X103 50.00 MHz

2) Noise Suppression Components (EMI filter, etc.)

a) Location : L103

Type : BK1608HS601

Rating : 600 Ω at 100 MHz

Mfr. : Taiyo Yuden Co., Ltd.

b) Location : FL104

Type : EXCEMT332DT

Rating : 16V dc, 5A -25dB at 40 to 160 MHz

Mfr. : Matsushita Electronic Components Co., Ltd.

c) Location : L110

Type : BLM11A601S

Rating : 600 Ω at 100 MHz

Mfr. : Fukui Murata Mfg. Co., Ltd.

d) Location : L109

Type : ACA3216M3-600

Rating : 600 Ω at 100 MHz

Mfr. : TDK Corporation

3. Indicate of FCC statements and FCC ID number in the rating label ;

This device complies with Part 15 of the FCC Rules.

Operation is Subject to the following two conditions :

(1) This device may not cause harmful interference, and

(2) this device must accept any interference received,
including interference that may cause undesired operation.
