| <p><b>Conducted Emission<br/>Test Setup*</b></p>              |  A photograph showing a conducted emission test setup. On the left, a piece of electronic equipment (likely a spectrum analyzer or power meter) is connected to a power source via a red cable. The power source is a large, grey, rectangular unit with a red terminal block. To the right, a laptop is open on a wooden table, displaying a software interface. A white power supply unit is also visible on the table. The background is a plain wall. |
| <p><b>Radiation Emission Test<br/>Setup (Below 30MHz)</b></p> |  A photograph showing a radiation emission test setup. A yellow, rectangular test object is placed on a metal stand. The stand is made of several vertical metal poles. The background is a wall covered with white, square-shaped electromagnetic interference (EMI) shields. The floor is dark and has yellow and black safety markings.                                                                                                               |

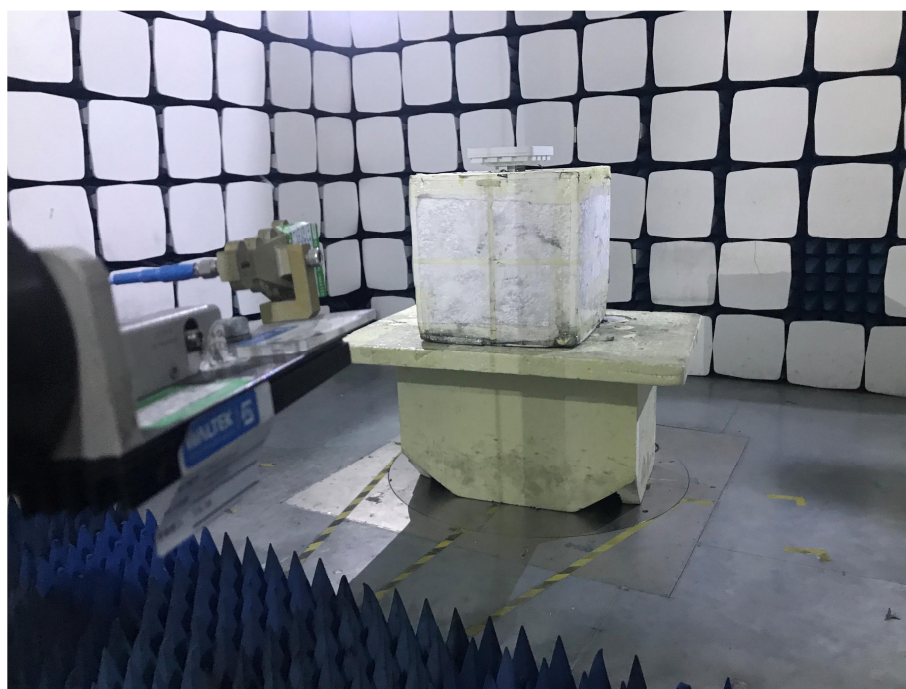

**Radiation Emission Test  
Setup (30MHz to 1GHz)**

**Radiation Emission Test  
Setup (1GHz to 18GHz)**

**Radiation Emission Test  
Setup (Above 18GHz)**

**\* Means' only test and setup for PART 15C.**
