Subject: #13166 Skybility - MPE Calculation
Sent: 2/25/2003 4:25 PM

Importance: Normal

Hello again,

One final thing:

Users/Install manual states gain of 3-5 dB. Confirm that MPE Calculation allows this.

You can show calculation as a separate exhibit instead of amending report. (An example of formula is attached from another report).

Any questions, let me know.

Marianne
