
1900 MHz SPURIOUS EMISSIONS (Radiated)

Per 2.1053 and Part 24, field strength of spurious radiation was measured at Underwriters Laboratories Inc. Research Triangle Park, NC site. The measurement procedure utilizes EIA IS-137 as guide. Measurements were made on a 3 meter test site. Results are shown on the following Exhibit.

Note: The spectrum was examined through the 10th harmonic of the carrier. Measurements recorded are peak measurements.
