Instructions**1.Installation**

- Open the package and spread the strip straight. Please check whether the strip light appearance and all parts are in good condition. Then power the strip light to test whether it could light normal.
- Clean the surface of the object where the strip needs to be installed and keep it dry.
- Tear off the adhesive tape, paste the strip on the correct place at once time. Install the clips at the beginning and the end of the strip. If there is a corner, place the clips on each side of the right angle. (Notice: Do not move the strip light to other place after it is attached.)
- Press the strip firmly from the beginning to the end to remove the air from the strip and the surface of the object.

- The installation is over, please provide the power for it. Enjoy the wonderful light.

Should you have any question, please give me the letter via support@govee.com

FCC STATEMENT

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

1. Reorient or relocate the receiving antenna.
2. Increase the separation between the equipment and receiver.
3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
4. Consult the dealer or an experienced radio/TV technician for help.
