

**Kidde "Safe 'N' Sound" Wireless Voice Module** Model RF-SND

120 VAC (60 Hz, 300 mA RMS MAX) 9V BATTERY BACKUP.

For repair or service, call Kidde Residential & Commercial, Mebane, NC 27302 (800-880-6788).

Three-pulse alarm pattern with a verbal "Danger, Fire" voice warning indicates that a Kidde Wireless Smoke alarm has sent an alarm signal or a test button has been pressed. A "chirp" approximately once every 60 seconds indicates a low or missing battery.

**WARNING!** Use only the batteries specified below or in the manual. Use of different batteries may have a detrimental effect on the alarm. Replace batteries once a year or when "chirp" occurs.

USE ONLY THE FOLLOWING 9 VOLT ALKALINE BATTERIES:

DURACELL MN1604 OR MX1604; ENERGIZER 522; or PANASONIC 6AM6, 6AM-6, 6AM-6PI, 6AM6X OR 6LR61(GA)

Not recommended for use at temperatures below 40 F or above 100 F, or in humidity higher than 85%, as these conditions may reduce battery life.

**Green LED:**

The green LED will illuminate as described below:

ON CONSTANTLY: unit powered by AC and has not sensed particles of combustion.

BLINK APPROXIMATELY ONCE EVERY 10 SECONDS: unit powered by battery only.

Clean your alarm annually by unplugging the unit and wiping it with a damp cloth.

**WARNING!** This audible signaling device is NOT a smoke alarm and has no means of detecting a hazardous condition. This audible signaling device MUST be used in conjunction with one or more Kidde RF-SM-ACDC A.C. wire-in or RF-SM-DC battery operated smoke alarms. All Wireless units must be set to the same switch settings before they are powered up in order to work properly.

**FCC ID: SAK9000164**

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

Fire Alarm Service - Private mode only per NFPA 72

This Device is rated for xx dB at 10 ft.

Patent Pending.

SEE OWNER'S MANUAL FOR COMPLETE INSTRUCTIONS. WEEKLY TESTING IS REQUIRED
