

EXHIBIT 1-1

CFS8DL5800WAVE

Functional Description.

The **5800WAVE WIRELESS** siren device is a fixed transceiver used as part of Ademco's wireless 5800 alarm system.

It is used to provides remote alarm indications, upon reception of a control instruction. The 5800WAVE can also send tamper messages if faulted, and standard supervision or check-in messages, but no more than once an hour.

These messages are transmitted at 345Mhz +/-82kHz using on-off keyed AM modulation.
